Curating Access Amanda Cachia,2022-09-14 This book is an interdisciplinary collection of twenty four essays which

critically examine contemporary exhibitions and artistic practices that focus on conceptual and creative aspects of access. Oftentimes exhibitions tack on access once the artwork has already been executed and ready to be installed in the museum or gallery. But what if the artists were to ponder access as an integral and critical part of their artwork? Can access be creative and experimental? And furthermore, can the curator also fold access into their practice while working collaboratively with artists, considering it as a theoretical and practical generative force that seeks to make an exhibition more engaging for a wider diversity of audiences? This volume includes essays by a growing number of artists, curators, and scholars who ponder these ideas of ad hoc experimental and underground approaches within exhibition making and artistic practices. It considers how, through these nascent exhibition models and art practices, enhanced experiences of access in the museum can be a shared responsibility amongst museum workers, curators, and artists in tandem with the public, so that access becomes a zone of intellectual and creative accommodation rather than strictly a discourse on policy. The book provides innovative case studies which provide a template for how access might be implemented by individuals, artists, curators, museum administrators, and educators, given the growing need to offer as many modalities of access as possible within cultural institutions. This book shows that anyone can be a curator of access and demonstrates how to approach access in a way that goes beyond protocol and policy. It will thus be of interest to students and scholars engaged in the study of museums, art history, and visual culture, disability culture, and communication.

The Possibility/Impossibility of a New Critical Language in Education, 2010-01-01. The critique of Critical Pedagogy in its current various trends and paths teaches me not only the shortcomings of various versions of Critical Pedagogy. No less important, it offers an invitation to a reflection on the limitations, costs, and open horizons of critique itself. It is an invitation to transcend critique as such. But what alternative do we have, and from where, or with what ears might we listen to the music of the new call? What is it that awaits us outside the critical tradition that in an unproblematic manner we could use, internalize, or surrender ourselves to? Such questions reintroduce us to Utopia. They reintroduce us to the Utopia of the possibility of happiness of the kind that is neither made

possible nor advocated by self abandonment and enslavement destruction of the otherness of the Other and the I This book manifests a refusal to abandon Critical Theory s telos it offers no solutions victories of the oppressed and emancipation neither does it promise peace and unproblematic consensus On the contrary all the eternal open Diasporic individual can hope for is worthy Diasporic Love of Life creativity mature forms of togetherness and eternal nomadism as a manifestation of co poiesis **Competition in the Communications Marketplace** United States.
