Twenty Years of Education Transformation in Gauteng 1994 to 2014 Maringe, Felix, Prew, Martin, 2015-05-05 Twenty Years of Education Transformation in Gauteng 1994 to 2014 An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994 These essays talk to what a provincial education department does and how and why it does these things whether it be about policy resourcing or implementing projects Each essay is written by one or more specialist in the relevant focus area The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years both nationally and provincially There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years *Creating Effective Teaching and Learning Spaces: Shaping Futures and Envisioning Unity in Diversity and Transformation* Zilungile Lungi Sosibo, Eunice Ivala, 2021-09-07 Higher education in post apartheid South Africa was always likely to attract academic interest and yet there remains a dearth of research on creating teaching and learning spaces suitable for students from diverse backgrounds Using examples from higher education institutions across the Southern African Developing Community SADC region this volume explores the ways teaching and learning spaces are being used to advance the transformation agenda of higher education in these regions and provides concrete recommendations for the future The book is sure to appeal to academics from a variety of disciplines from African American and ethnic studies to education and sociology It will be of particular interest to teacher trainers administrators and policy makers working in higher education and anyone else with a stake in managing cultural diversity in education *Practitioner's Guide to Developmental and Psychological Testing* Glen P. Aylward, 2013-06-29 The practice of primary health care has expanded beyond the traditional medical model Primary care physicians and allied professionals are called upon more frequently to address parental concerns about developmental delays poor school performance or behavioral problems As a result pediatricians family practitioners pediatric nurses social workers and speech language specialists are faced with the issue of developmental and psychological testing The degree of the clinician's involvement in testing varies from interpretation of reports to performing screening or assessments In many cases the primary health care professional assumes the role of case manager Unfortunately cooperation between disciplines often has been limited because of poor communication particularly in regard to developmental and psychological testing where acronyms statistics and jargon abound Even professionals from mental health disciplines such as child psychiatrists or psychiatric social workers sometimes are overwhelmed The purpose of this book therefore is to provide the clinician with practical information

regarding developmental and psychological testing thereby making the health care professional an educated consumer This text does not simply describe how psychologists perform testing rather it provides information to help clinicians understand what the tests contain what their strengths and limitations are and how they can be incorporated into practice
