Verstraete,2004-07-01 This book presents recent developments in the field of environmental biotechnology Three major forces are currently driving this discipline the exploration of microbial diversity by genetic and genomic tools the ongoing progress in the modelling of various transient phenomena and environmental biotechnology This book provides a state of art overview of developments in the field of environmental biotechnology concerning exploration implementation modelling economic development and safety It comprises selected peer reviewed papers that were presented at the European Symposium on Environmental Biotechnology ESEB 2004 held in Oostende Belgium April 2004 Marine Algae Extracts Se-Kwon Kim,Katarzyna Chojnacka,2015-02-10 Designed as the primary reference for the biotechnological use of macroalgae this comprehensive handbook covers the entire value chain from the cultivation of algal biomass to harvesting and processing it to product extraction and formulation In addition to covering a wide range of product classes from polysaccharides to terpenes and from enzymes to biofuels it systematically discusses current and future applications of algae derived products in pharmacology medicine cosmetics food and agriculture In doing so it brings together the expertise of marine researchers biotechnologists and process engineers for a one stop resource on the biotechnology of marine macroalgae *Ethylene: A Key Regulatory Molecule in Plants* Nafees A. Khan,M. Iqbal R. Khan,Antonio Ferrante,Péter Poór,2017-12-21 Ethylene is a simple gaseous phytohormone with multiple roles in regulation of metabolism at cellular molecular and whole plant level It influences performance of plants under optimal and stressful environments by interacting with other signaling molecules Understanding the ethylene biosynthesis and action through the plant s life can contribute to improve the knowledge of plant functionality and use of this plant hormone may drive adaptation and defense of plants from the adverse environmental conditions The action of ethylene depends on its concentration in cell and the sensitivity of plants to the hormone In recent years research on ethylene has been focused due to its dual action on the regulation of plant processes at physiological and molecular level The involvement of ethylene in the regulation of transcription needs to be widely explored involving the interaction with other key molecular regulators The aim of the current research topic was to explore and update our understanding on its regulatory role in plant developmental mechanisms at cellular or whole plant level under optimal and changing environmental conditions The present edited volume includes original research papers and review articles describing ethylene s regulatory role in plant development during plant ontogeny and also explains how it interacts with biotic and abiotic stress factors This comprehensive collection of researches provide evidence that ethylene is essential in different physiological processes and does not always work alone but in coordinated manner with other plant hormones This research topic is also a source of tips for further works that should be addressed for the biology and molecular effects on plants North American Journal of Aquaculture ,2008 *Applied and Environmental Microbiology* ,1997 **Cancer Research** ,2009-02 **American**
