

Building Paper Applications

Figure 4 Rough Opening Preparation for construction methods using building paper and sill panning.

1. Make an "apron" by cutting a 9" (229) wide strip of Grade D building paper approximately 24" (610) longer than the window rough opening width. Center the apron even with the bottom of the RO and staple along the top edge only. See figure 4a.
2. Run a bead of sealant approximately 3/4" (19) from the edge of the opening. Start the bead about 6" (152) up from the sill (or the height of the sill panning). See figure 4b.
3. Install sill panning following manufacturer's instructions. See figure 4c.
4. Cut a 13" (330) piece of Grade D building paper 24" (610) longer than the RO height (adjust width for jamb depth). Tack the pieces in place, overlapping the RO by as much as the jamb depth. Use a utility knife to cut the paper even at the head jamb and sill. Fold jamb flaps to the interior and tack in place. See figure 4d.
5. Starting in 3/4" from the side, apply a 1/4" to 3/8" bead of sealant 1/2"-3/4" across the top of the RO stopping 3/4" in from the end. Apply sealant down both sides of the window opening in the same manner. Do not apply sealant across the RO bottom. See figure 4e.
