In accordance with the average-impairment principle, impairment must also occur when the performance obligation is satisfied. Typically, the performance obligation is satisfied when the goods transfer from the seller to the buyer. At the point the sales transaction is complete and the sales price established.

Sales may be made on credit or for cash. A **business document** should support every sales transaction, to provide written evidence of the sale. Each major business document provides evidence of cash sales. [Sales Invoices](#), like the sales invoice in [Document 14](#) (page 13), provides support for a credit sale. The original copy of the invoice goes to the customer and the seller keeps a copy for use in recording the sale. The invoice shows the date of sales document issue, total sales price, and sales-related information.

The seller transfers two ounces to each son. The first sony retains the sale. The seller increases delivery until the amount becomes 1/2 ounce and also increases (judicial) Nika between. The second sony retains the sale of the merchandise sold. The seller increases judicial Cost of Goods sold and also increases judicial Inventory for the cost of these goods. Here, too, the Sonny's account will state a net value the amount of increase that should be in stock.

To illustrate a ready-to-use response, PW Audio Supply sends us May 1994 of \$1,000 in Trade Notes (see Illustration 14) as follows (assume the other illustration cost PW Audio Supply \$1,000).

Step	Account Debit	Account Credit	Debit	Credit
Step 1	Accounts Receivable Sales Revenue (The amount credit sale is Cash Sales get received \$100)		100	100
Step 2	Cash Sales Accounts Receivable (The amount sale of Cash Sales will be received \$100)		100	100

For internal decision-making purposes, merchandising companies can use more than one sales account. For example, PW Radio Supply may decide to keep separate sales accounts for its sales of TVs, Hi-Fi systems and hi-fi speakers. **EW** might use separate accounts for carrying pet supplies, children's clothing, and so on. **EW** might have two sales accounts for carrying different brands of clothing. By using separate sales accounts for major product lines, rather than a single combined sales account, company management can more clearly measure sales trends and compare more intelligently the changes in sales patterns. For example, if TV sales are increasing while Hi-Fi sales are decreasing, PW Radio Supply might concentrate both in obtaining and selling additional Hi-Fi items to ensure that sales continue.

the 1997 statement generated a similar forecast, a worldwide economic scenario would provide only a slight uptick in growth—the rest of all of its individual sub-scenarios. This is true for two reasons. First, providing detail on all of its individual sub-scenarios would take considerable length to be accurate. Moreover, financial companies do not want their competitors to know the details of their operating results. However, **Microsoft** recently expanded its business to include more than 100 lines in two types: the consumer and the additional computer software. Microsoft's statement says it had to reduce the growth of the company's consumer and Internet businesses.

Many companies are trying to improve the quality of their customer service by making the customer service staff more visible and accessible.
