Introduction To Communication Studies Gary McCarron:

Cultural Theory in the Films of Alfred Hitchcock Gary McCarron, 2023-07-11 This book is neither biography nor a conventional film critique Rather the text explores aspects of Hitchcock's work in relation to theories drawn from the social sciences and philosophy The various chapters focus not on specific films but on broader ideas central to Hitchcock's work There is for instance a chapter on his idea of the MacGuffin in which I use Ernesto Laclau's theories of equivalent substitution to explain how the MacGuffin functions in Hitchcock's works There is also a chapter on his notion of pure cinema which moves from the idea of purity as an anthropological concept to consider purity in relation to current debates regarding so called hybrid media and Hitchcock's relevance to these issues in respect of his dissatisfaction with the advent of sound to the cinema world Broadly speaking the book uses Hitchcock's films to illustrate ideas in the social sciences and philosophy and uses those same ideas to illustrate aspects of Hitchcock's films Eco-Trauma Cinema Anil Narine, 2014-09-19 Film has taken a powerful position alongside the global environmental movement from didactic documentaries to the fantasy pleasures of commercial franchises This book investigates in particular film's complex role in representing ecological traumas Eco trauma cinema represents the harm we as humans inflict upon our natural surroundings or the injuries we sustain from nature in its unforgiving iterations The term encompasses both circumstances because these seemingly distinct instances of ecological harm are often related and even symbiotic the traumas we perpetuate in an ecosystem through pollution and unsustainable resource management inevitably return to harm us Contributors to this volume engage with eco trauma cinema in its three general forms accounts of people who are traumatized by the natural world narratives that represent people or social processes which traumatize the environment or its species and stories that depict the aftermath of ecological catastrophe The films they examine represent a central challenge of our age to overcome our disavowal of environmental crises to reflect on the unsavoury forces reshaping the planet's ecosystems and to restructure the mechanisms responsible for the state of the earth *The ^AMen Who Knew Too Much* Susan M. Griffin, Alan Nadel, 2011-12-19 Henry James and Alfred Hitchcock knew too much Self imposed exiles they approached American and European society as inside outsiders a position that afforded them a kind of double vision Masters of their arts manipulators of their audiences prescient and pathbreaking in their techniques these demanding and meticulous craftsmen produced some of the greatest art of the last 150 years This capacious collection with its brilliant insights and intellectual surprises is equally compelling in its range and cogency for James readers and film theorists for Hitchcock fans and James scholars Introduction to Communication Studies John Fiske, 2008 **Resources in Education** , 1985 *Exceptional Child Education Resources* , 1985 *Introduction to Communication Studies* UNITEC Institute of Technology.
