

Lesson 15

Visual Basic

Inventor Release 5 includes a Visual Basic Editor to allow users to customize Inventor. With VBA, you can create your own dialog boxes and interface tools. VBA does not create standalone applications, but always runs from inside Inventor.

You create IVB files by selecting **Files->New Project**. The advantage of an IVB file is that it's independent of the document.

The Visual Basic Editor is accessed from
**Tools->Macro->
Visual Basic Editor**

TIP: If you plan to do a lot of customization, it is worthwhile to invest in a full copy of Visual Basic from Microsoft. That will give you access to a suite of tools. The Visual Basic Editor inside of Inventor is a scaled-down version of the full application.

The Internet is a great source for Visual Basic tutorials, ActiveX controls, and tools you can use for creating super applications.

TIP: It is a good idea to create a sketch of how you want your dialog box to appear before you start to help you with laying out your control tools.
