economists including three Nobel laureates evaluate and rank the attractiveness of the policies This authoritative and thought provoking book will challenge readers to form their own conclusions about the best ways to respond to global warming

**Challenges and Solutions for Climate Change** Wytze van der Gaast, Katherine Begg, 2012-05-22 The latest scientific knowledge on climate change indicates that higher greenhouse gas concentrations in the atmosphere through unchecked emissions will provoke severe climate change and ocean acidification Both impacts can fundamentally alter environmental structures on which humanity relies and have serious consequences for the food chain among others Climate change therefore poses major socio economic technical and environmental challenges which will have serious impacts on countries pathways towards sustainable development As a result climate change and sustainable development have increasingly become interlinked A changing climate makes achieving Millennium Development Goals more difficult and expensive so there is every reason to achieve development goals with low greenhouse gas emissions This leads to the following five challenges discussed by Challenges and Solutions for Climate Change

- 1 To place climate negotiations in the wider context of sustainability equity and social change so that development benefits can be maximised at the same time as decreasing greenhouse gas emissions
- 2 To select technologies or measures for climate change mitigation and adaptation based on countries sustainable development and climate goals
- 3 To create low greenhouse gas emission and climate resilient strategies and action plans in order to accelerate innovation needed for achieving sustainable development and climate goals on the scale and timescale required within countries
- 4 To rationalize the current directions in international climate policy making in order to provide coherent and efficient support to developing countries in devising and implementing strategies and action plans for low emission technology transfers to deliver climate and sustainable development goals
- 5 To facilitate development of an international framework for financial resources in order to support technology development and transfer improve enabling environments for innovation address equity issues such as poor people s energy access and make implementation of activities possible at the desired scale within the country

The solutions presented in Challenges and Solutions for Climate Change show how ambitious measures can be undertaken which are fully in line with domestic interests both in developing and in developed countries and how these measures can be supported through the international mechanisms

**Designing Climate Solutions** Hal Harvey, Robbie Orvis, Jeffrey Rissman, 2018-11-01 With the effects of climate change already upon us the need to cut global greenhouse gas emissions is nothing less than urgent It s a daunting challenge but the technologies and strategies to meet it exist today A small set of energy policies designed and implemented well can put us on

the path to a low carbon future Energy systems are large and complex so energy policy must be focused and cost effective One size fits all approaches simply won't get the job done Policymakers need a clear comprehensive resource that outlines the energy policies that will have the biggest impact on our climate future and describes how to design these policies well Designing Climate Solutions A Policy Guide for Low Carbon Energy is the first such guide bringing together the latest research and analysis around low carbon energy solutions Written by Hal Harvey CEO of the policy firm Energy Innovation with Robbie Orvis and Jeffrey Rissman of Energy Innovation Designing Climate Solutions is an accessible resource on lowering carbon emissions for policymakers activists philanthropists and others in the climate and energy community In Part I the authors deliver a roadmap for understanding which countries sectors and sources produce the greatest amount of greenhouse gas emissions and give readers the tools to select and design efficient policies for each of these sectors In Part II they break down each type of policy from renewable portfolio standards to carbon pricing offering key design principles and case studies where each policy has been implemented successfully We don't need to wait for new technologies or strategies to create a low carbon future and we can't afford to Designing Climate Solutions gives professionals the tools they need to select design and implement the policies that can put us on the path to a livable climate future Uncertainty and Imprecision in Decision Making and Decision Support: New Challenges, Solutions and Perspectives Krassimir T.

**Structuring an Energy Technology Revolution** Charles Weiss, William B. Bonvillian, 2012-01-13 An argument for a major federal program to stimulate innovation in energy technology and a proposal for a policy approach to implement it America is addicted to fossil fuels and the environmental and geopolitical costs are mounting A public private program at an expanded scale to stimulate innovation in energy policy seems essential In Structuring an Energy Technology Revolution Charles Weiss and William Bonvillian make the case for just such a program Their proposal backs measures to stimulate private investment in new technology within a revamped energy innovation system It would encourage a broad range of innovations that would give policymakers a variety of technological options over the long implementation period and at the huge scale required faster than could be accomplished by market forces alone Even if the nation can't make progress at this time on pricing carbon a technology strategy remains critical and can go ahead now Strong leadership and public support will be needed to resist the pressure of entrenched interests against putting new technology pathways into practice in the complex and established energy sector This book has helped start the process

**Nature-Based Solutions for Flood Mitigation** Carla S. S. Ferreira, Zahra Kalantari, Thomas Hartmann, Paulo Pereira, 2022-05-30 This book provides an overview of the typical nature based solutions NBS used for flood mitigation at different scales and in different areas e g from catchment to hillslope scale from urban to coastal areas NBS can provide several ecosystem services such as water regulation and water quality enhancement and as such offer relevant technical solutions to complement typical grey

infrastructures to mitigate flood hazard and water quality problems In recent years political awareness and interest from the scientific community have led to increasing implementation of NBS worldwide In light of this trend this book provides valuable insights into the environmental aspects of NBS particularly their effectiveness for flood and pollution mitigation and discusses socio economic aspects related to the implementation of NBS including regulatory aspects cost and citizens perceptions of NBS Compiling the latest research the book furthers our understanding of the role of NBS for flood mitigation and its relation to environmental aspects to guide scientists and stakeholders in future NBS projects It is intended for the scientific community and stakeholders such as spatial planners and landscape managers Chapter Nature based solutions for flood mitigation and resilience in urban areas is available open access under a Creative Commons Attribution 4 0

International License via link [springer.com](http://springer.com) **Indian Ocean Challenges: A Quest for Cooperative Solutions** Vice Admiral Pradeep Kaushiva, Commander Abhijit Singh, 2013-02-15 The Indian Ocean Region IOR is of immense strategic significance on the global maritime map not just on account of its centrality to the current trade and energy flows but also because of the extreme disparities and inherent volatility of the region The region faces an array of security challenges both traditional and non traditional These include security of SLOCs the problem of piracy the possibility of renewed terrorism at and from the sea and the pervasive smuggling of people narcotics and arms The narrative of regional maritime security is also characterized by oscillating economic growth growing military presence and a rapidly deteriorating ecological balance in the Indian Ocean A stand out feature of the IOR is the lack of correspondence between nations on issues concerning security While using the high seas for trade transportation of energy major powers have tended to neglect the impact of the economic activities on the sea itself In contrast smaller regional countries and island states with developing economies have at best been able to use only those resources of the sea which are vital to their survival As the challenges rise the need to factor in and secure effective management of the Indian Ocean has turned into a compelling imperative While governments and authorities grapple with complex issues trying to forge a coherent maritime policy there is a growing recognition that unless solutions are found quickly lives livelihoods and in some cases the very future of local populations could be at risk This book contains a comprehensive overview of perspectives of some of the stakeholders in the Indian Ocean Region It seeks to identify the key maritime security issues and explores the potential contribution of the stakeholders in meeting these challenges

*Menu of Hope: Alternatives to the Food That Is Destroying Our Planet* Gaia Kile, 2025-01-10 Is animal agriculture worth the cost to our planet This thought provoking book explores the environmental health and ethical issues tied to raising animals for food and offers a comprehensive look at solutions for a sustainable future Menu of Hope begins by dissecting the role of animal agriculture in climate change drawing on scientific findings from the IPCC and other sources It sheds light on why estimates of its impact vary and why this matters in addressing the crisis The role of animal agriculture is only set to expand Demand for meat is expected to grow by 50% or more in the next few decades Animal agriculture already

plays a major role in the climate crisis But climate is not the only crisis caused by raising animals Loss of biodiversity deforestation environmental pollutants and pandemics are all problems exacerbated by our insatiable appetite for animal products In its solutions focused chapters Menu of Hope evaluates approaches ranging from agricultural efficiency and carbon capture to cutting edge food technologies major public health interventions and vegan activism Each solution is assessed for its potential to create meaningful change The final chapter emphasizes activism policy change and the importance of collective action in tackling one of the greatest challenges of our time
