Bank 3.0 Brett King, 2012-11-19. The first edition of *BANK 2.0* is on Amazon's bestseller list for banking and finance in the US, UK, Germany, France, and Japan for over 18 months, took the financial world by storm, and became synonymous with disruptive customer behaviour, technology shift, and new banking models. In *BANK 3.0*, Brett King brings the story up to date with the latest trends redefining financial services and payments from the global scramble for dominance of the mobile wallet and the expectations created by tablet computing to the operationalising of the cloud, the explosion of social media, and the rise of the de-banked consumer who doesn't need a bank at all. *BANK 3.0* shows that the gap between customers and financial services players is rapidly widening, leaving massive opportunities for new non-bank competitors to totally disrupt the industry. On the Web and on Mobile, the customer isn't king; he's dictator. Highly impatient, skeptical, cynical, Brett King understands deeply what drives this new hard-nosed customer. Banking professionals would do well to heed his advice. Gerry McGovern, author of *Killer Web Content*.

History of Apple iOS IntroBooks Team. Today, Apple is going to reinvent the phone with those eight words that shook the mobile market on 9th Jan 2007. It was a Macworld Conference and Expo in San Francisco where Steve Jobs, the Apple CEO, first introduced the iPhone to the world. And with the very first iPhone, Apple launched their personalized operating system for their phones, the iOS. On June 29th, 2007, iOS, primarily known as iPhone OS, was launched for the first time. Since then, in every summer, they have reinvented the mobile operating system, and with each update, they blow their consumers' minds with what is possible with their iDevices. And they are still improving. As mentioned before, Apple iOS is a personalized operating system specially designed for all the electronic devices by Apple, like the iPhones, iPad, and iPod touch. The iOS was first announced on June 29th, 2007, and since then, it has come a long way and saw a lot of major changes too. Since the first iPhone OS, renamed as iOS, later, the updates were released through iTunes software. And after iOS 5, it started releasing via over-the-air updates. Since then, the consumers never needed to use a USB on iTunes to connect with iOS. They started using iCloud for data synchronization. Every year, a new version of iOS is usually launched with a new iPhone model. In Apple's yearly Worldwide Developers Conference (WWDC), they announce the new major iOS update and release it in September of the same year. The latest stable update of iOS is iOS 12.3.2. This update has been released on June 10th, 2019. The most recent Beta version of iOS, the iOS 12.4 Beta 4, has been released on the very next day. And Apple has already announced iOS 13 and some of its special features such as dark mode on 3rd June 2019 in their Worldwide Developers Conference (WWDC).
