Beddow,Alexander Kurz,2011-04-28 The Handbook of Accessible Achievement Tests for All Students Bridging the Gaps Between Research Practice and Policy presents a wealth of evidence based solutions designed to move the assessment field beyond universal standards and policies toward practices that enhance learning and testing outcomes Drawing on an extensive research and theoretical base as well as emerging areas of interest the volume focuses on major policy concerns instructional considerations and test design issues including The IEP team s role in sound assessment The relationships among opportunity to learn assessment and learning outcomes Innovations in computerized testing and the 6D framework for standard setting Legal issues in the assessment of special populations Guidelines for linguistically accessible assessments Evidence based methods for making item modifications that increase the validity of inferences from test scores Strategies for writing clearer test items Methods for including student input in assessment design Suggestions for better measurement and tests that are more inclusive This Handbook is an essential reference for researchers practitioners and graduate students in education and allied disciplines including child and school psychology social work special education learning and measurement and education policy **Test Equating, Scaling, and Linking** Michael J. Kolen,Robert L. Brennan,2013-03-14 Test equating methods are used with many standardized tests in education and psychology to ensure that scores from multiple test forms can be used interchangeably In recent years researchers from the education psychology and statistics communities have contributed to the rapidly growing statistical and psychometric methodologies used in test equating This book provides an introduction to test equating which both discusses the most frequently used equating methodologies and covers many of the practical issues involved This second edition expands upon the coverage of the first edition by providing a new chapter on test scaling and a second on test linking Test scaling is the process of developing score scales that are used when scores on standardized tests are reported In test linking scores from two or more tests are related to one another Linking has received much recent attention due largely to investigations of linking similarly named tests from different test publishers or tests constructed for different purposes The expanded coverage in the second edition also includes methodology for using polytomous item response theory in equating The themes of the second edition include the purposes of equating scaling and linking and their practical context data collection designs statistical methodology designing reasonable and useful equating scaling and linking studies importance of test development and quality control processes to equating equating error and the underlying statistical assumptions for equating Given the perennial debates about academic standards and grade inflation it is my view that tools such as those described in this book should be adopted much more widely by the academic community than they are at present This book provides an excellent overview and I strongly recommend it Short Book Reviews of the ISI April2005 I highly recommend this
