These bolts are designed to fit under conventional loads. Heavy impact shock loads will shorten their life.

Fasteners should be replaced with the same or higher grade. If higher grade fasteners are used, these should only be replaced to the strength of the original.

Make sure fastener threads are clean and that you properly seat thread engagement. This will prevent them from being under tension.

Tighten plastic lined or coated oversized hole nuts is approximately 80 percent of the dry torque shown in the chart, applied to the nut, not to the bolt head. Tighten locking or serrated type lock nuts to the full torque value.
