*Smart Metering Applications* Nikolaos Efkarpidis, Martin Geidl, Holger Wache, Marco Peter, Marc Adam, 2022-10-03 This book presents a large number of smart metering applications from the points of view of different stakeholders. The applications are clustered with respect to three types of stakeholders: a) end customers, b) energy service providers, and c) authorities, research institutions, or other organizations. The goal of the book is to examine the implementation potential for each application, considering the interests and benefits for the key stakeholders, main technical and regulatory requirements, as well as limitations and barriers. A business case for each application is created that can provide guidelines to the stakeholders involved in its realization. The book additionally investigates current business models for smart metering applications. A survey on the current techno-economic potential of such applications is conducted based on a questionnaire filled by various stakeholders. The book will be of interest to academic research institutions but also engineers in industry, authorities, or other organizations.

**Cloud Computing in Smart Energy Meter Management** G. Senbagavalli, T. Kavitha, N. Amuthan, Ferdin Joe John Joseph, 2025-04-17 Cloud Computing in Smart Energy Meter Management equips you with essential insights and practical solutions for effectively managing smart meter data through cutting-edge technologies like artificial intelligence and cloud computing, making it an invaluable resource for anyone looking to enhance their understanding of modern energy management. Cloud Computing in Smart Energy Meter Management presents a structured review of the current research on smart energy meters with artificial intelligence and cloud computing solutions. This book will help provide solutions for processing and analyzing the massive amounts of data involved in smart meters through cloud computing. Readers will learn about data storage, processing, and dynamic pricing of smart energy data in the cloud, as well as smart metering concepts dealing with the flow of power consumption from consumer to utility center. It offers an in-depth explanation of advanced metering infrastructure (AMI) which includes meter installation, meter advising, commissioning, integration, master data synchronization, billing, customer interface, complaints, and resolution. In smart cities, components in household energy meters are fitted with sensors and can interconnect with the Internet of Things to measure power consumption with an automated meter reading. This book also acts as a new resource describing new technologies involved in the integration of smart metering with existing cellular networks. Cloud Computing in Smart Energy Meter Management provides knowledge on the vital role played by artificial intelligence and cloud computing in smart energy meter reading with precise evaluations.

**Smart Grid** K S MANOJ, 2020-01-03 All basic knowledge is provided for the Energy Engineers and the Electrical Electronics Computer and Instrumentation Engineering students who work or wish to work in Smart Grid and Microgrid area. It benefits them in obtaining essential and required understanding of the Smart Grid from perceptions to actualisation. The book presents the Smart Grid from abstraction to materialization. Covers power grid networks including how they are developed and deployed for power delivery and other Smart Grid services. Discusses power systems advanced

communications and required machine learning that define the Smart Grid Clearly differentiates the Smart Grid from the traditional power grid as it has been for the last century Provides the reader with a fundamental understanding of both physical cyber security and computer networking Presents the complexity and operational requirements of the evolving Smart Grid to the ICT professional and presents the same for ICT to the energy engineers Provides a detailed description of the cyber vulnerabilities and mitigation techniques of the Smart Grid Provides essential information for technocrats to make progress in the field and to allow power system engineers to optimize communication systems for the Smart Grid Is a suitable material for the undergraduate and post graduate students of electrical engineering to learn the fundamentals of Smart Grid
