Landscape Theory in Design Susan Herrington, 2016-12-08 Phenomenology Materiality Cybernetics Palimpsest Cyborgs Landscape Urbanism Typology Semiotics Deconstruction the minefield of theoretical ideas that students must navigate today can be utterly confusing and how do these theories translate to the design studio *Landscape Theory in Design* introduces theoretical ideas to students without the use of jargon or an assumption of extensive knowledge in other fields and in doing so links these ideas to the processes of design In five thematic chapters Susan Herrington explains the theoretic groundings of the theory of philosophy why it matters to design an example of the theory in a work of landscape architecture from the twentieth and twenty first centuries debates surrounding the theory particularly as they elaborate modern and postmodern thought and primary readings that can be read as companions to her text An extensive glossary of theoretical terms also adds a vital contribution to students comprehension of theories relevant to the design of landscapes and gardens Covering the design of over 40 landscape architects architects and designers in 111 distinct projects from 20 different countries *Landscape Theory in Design* is essential reading for any student of the landscape *Landscape Architectural Graphic Standards* Leonard J. Hopper, 2012-02-24 The new student edition of the definitive reference on landscape architecture

Landscape Architectural Graphic Standards Student Edition is a condensed treatment of the authoritative Landscape Architectural Graphic Standards Professional Edition. Designed to give students the critical information they require, this is an essential reference for anyone studying landscape architecture and design. Formatted to meet the serious student's needs, the content in this Student Edition reflects topics covered in accredited landscape architectural programs, making it an excellent choice for a required text in landscape architecture, landscape design, horticulture, architecture, and planning and urban design programs. Students will gain an understanding of all the critical material they need for the core classes required by all curriculums, including Construction documentation, Site planning, Professional practice, Site grading and earthwork, Construction principles, Water supply and management, Pavement and structures in the landscape, Parks and recreational spaces, Soils, asphalt, concrete, masonry, metals, wood, and recreational surfaces, Evaluating the environmental and human health impacts of materials. Like Landscape Architectural Graphic Standards, this Student Edition provides essential specification and detailing information on the fundamentals of landscape architecture, including sustainable design principles, planting, including green roofs, stormwater management, and wetlands construction and evaluation. In addition, expert advice guides readers through important considerations such as material life cycle analysis, environmental impacts, site security, hazard control, environmental restoration and remediation, and accessibility. Remixing the Landscape Architecture History Class Daniel C. Jost, 2015

The pedagogical goals for landscape architecture history courses required as part of the curriculum in professional degree programs in landscape architecture vary from school to school. One goal of some of these courses has been to provide a broad survey of the field of landscape architecture. But analysis shows some of the major design challenges and project types designers face today have minimal representation in the imagery in Elizabeth Barlow Rogers's *Landscape Design: A Cultural and Architectural History*, which many landscape architecture history classes in the U.S. use as a primary text. This project explored how a one-quarter survey of historical landscapes that is offered as part of a landscape architect's professional education might be taught in a way that more closely correlates with some of the work designers are involved with today, as described by the American Society of Landscape Architects and the U.S. Bureau of Labor Statistics. I remixed Rogers's textbook together with other sources to provide a topically, stylistically, culturally, and chronologically broad introduction to the landscape architecture field that provides professional students a variety of examples of how they might learn from historical works of landscape architecture. Prior to creating this class, interviews were conducted to understand how current surveys of landscape architecture history that are required within the professional landscape architecture curriculum were being taught in an attempt to build on this understanding. The class resulting from these explorations was taught in the spring of 2015 at the University of Washington. Reflections are provided on the experience.
