The Process of International Legal Reproduction Rose Parfitt, 2019-01-17 That all states are free and equal under international law is axiomatic to the discipline Yet even a brief look at the dynamics of the international order calls that axiom into question Mobilising fresh archival research and drawing on a tradition of unorthodox Marxist and anti colonial scholarship Rose Parfitt develops a new modular legal historiography to make sense of the paradoxical relationship between sovereign equality and inequality Juxtaposing a series of seemingly unrelated histories against one another including a radical re examination of the canonical story of Fascist Italy's invasion of Ethiopia Parfitt exposes the conditional nature of the process through which international law creates and disciplines new states and their subjects The result is a powerful critique of international law's role in establishing and perpetuating inequalities of wealth power and pleasure accompanied by a call to attend more closely to the strategies of resistance that are generated in that process

The American Colonies in the Seventeenth Century Herbert Levi Osgood,1904 **The Strategic Constitution** Robert D. Cooter,2020-06-30 Making amending and interpreting constitutions is a political game that can yield widespread suffering or secure a nation s liberty and prosperity Given these high stakes Robert Cooter argues that constitutional theory should trouble itself less with literary analysis and arguments over founders intentions and focus much more on the real world consequences of various constitutional provisions and choices Pooling the best available theories from economics and political science particularly those developed from game theory Cooter s economic analysis of constitutions fundamentally recasts a field of growing interest and dramatic international importance By uncovering the constitutional incentives that influence citizens politicians administrators and judges Cooter exposes fault lines in alternative forms of democracy unitary versus federal states deep administration versus many elections parliamentary versus presidential systems unicameral versus bicameral legislatures common versus civil law and liberty versus equality rights Cooter applies an efficiency test to these alternatives asking how far they satisfy the preferences of citizens for laws and public goods To answer Cooter contrasts two types of democracy which he defines as competitive government The center of the political spectrum defeats the extremes in median democracy whereas representatives of all the citizens bargain over laws and public goods in bargain democracy Bargaining can realize all the gains from political trades or bargaining can collapse into an unstable contest of redistribution States plagued by instability and contests over redistribution should move towards median democracy by increasing transaction costs and reducing the power of the extremes Specifically promoting median versus bargain democracy involves promoting winner take all elections versus proportional representation two parties versus multiple parties referenda versus representative democracy and special governments versus comprehensive governments This innovative theory will have ramifications felt across national and disciplinary borders and will be debated by a large audience including the growing pool of economists interested in how law and politics shape economic policy

political scientists using game theory or specializing in constitutional law and academic lawyers The approach will also garner attention from students of political science law and economics as well as policy makers working in and with new democracies where constitutions are being written and refined

Corporal Punishment

Patrick Lenta,2017-09-14 The aim of this book is to assess the moral permissibility of corporal punishment and to enquire into whether or not it ought to be legally prohibited Against the widespread view that corporal punishment is morally legitimate and should be legally permitted provided it falls short of abuse Patrick Lenta argues that all corporal punishment even parental spanking is morally impermissible and ought to be legally proscribed The advantages claimed for corporal punishment over alternative disciplinary techniques he contends are slight or speculative and are far outweighed by its disadvantages He presents in addition a rights based case against corporal punishment arguing that children possess certain fundamental rights that all corporal punishment of them violates namely the right to security of the person and the right not to be subjected to degrading punishment Lenta's approach is unique in that it engages with empirical literature in the social sciences in order to fully examine the emotional and psychological effects of corporal punishment on children Corporal Punishment A Philosophical Assessment is a philosophically rigorous and engaging treatment of a hitherto neglected topic in applied ethics and social philosophy
