

SC-751

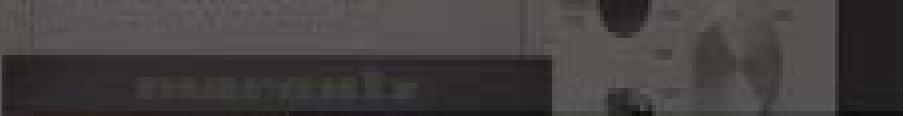

Multi-channel audio has come of age, and Super Audio has the standard. We have produced the SC-751, a new control amplifier inspired by the legendary Model 7, which long reigned supreme as the ultimate performer in its class. The capabilities of the SC-751 are inherited from one of the original components of audio perfection.

Model 7
Introduced in 1974, this legendary stereo control amplifier was conceived to be used by professionals and music lovers. Our founder, Ted S. Masters, therefore included frequency equalization for all modes that frequency available in that time. The philosophy behind the minimalist design and the special attention to even the smallest (component) details go still, more than thirty years later, inspiring our engineers.

MA-951

The pure class indicator is embodied in the tradition of the legendary Marantz brand. The MA-951 is the ultimate monaural power amplifier for driving even the most demanding speakers with absolute ease. It represents the perfect balance between new-age innovation and traditional quality, and verifies that our pioneering ideas of the celebrated Model 9 live on in the MA-951.

Model 9
A legendary monaural power amplifier introduced in 1961, called 10.01 tube in its days. It was praised for its design, its definition, its stability, high output power, which became the ultimate benchmark for its time. It was also the first model to carry on its front panel, what has become the traditional gold-plated Marantz logo.

In spite of the central position that the concept word has among the basic units of language structure, there is no consensus as to the definition of this concept or network of related concepts. Many perspectives are needed in order to gain even a schematic idea of what words are, how words may be composed, and what relationships there might be between words. Many linguists have put forward frameworks for describing the domain of morphology; each framework proceeding from its author's assumptions, prioritizing distinct formal and functional dimensions, and therefore entering into de facto competition. This book addresses the needs of the language scholar, student who finds her/himself engaged in morphological analysis and theorizing. It offers a guide to existing approaches, revealing how they can either complement or compete with each other. **Encoding and Navigating Linguistic Representations in Memory** Claudia Felser, Colin Phillips, Matthew Wagers, 2017-03-22. Successful speaking and understanding requires mechanisms for reliably encoding structured linguistic representations in memory and for effectively accessing information in those representations later. Studying the time course of real-time linguistic dependency formation provides a valuable tool for uncovering the cognitive and neural basis of these mechanisms. This volume draws together multiple perspectives on encoding and navigating structured linguistic representations to highlight important empirical insights and to identify key priorities for new research in this area.
