Mapping Sustainability Measurement Agnieszka Gehringer, Susann Kowalski, 2024-01-02 This book explores modern approaches to sustainability and its measurement. It thoroughly reviews a wide range of existing sustainability measurement systems. Accordingly, the book documents the state of progress toward sustainability measurement by first assessing the past development of wellbeing measurement going beyond GDP and synthesizing the various conceptual approaches to sustainability and its dimensions. It then explores crucial methodological aspects that stay at the core of constructing a sound index system. In the main part of the book, we map the available indices or index systems, their conceptual and methodological backgrounds, as well as approaches which have not yet resulted in an index but have the potential to contribute to a better understanding of sustainability. More specifically, the book assesses the scope, motivation, and potential usage of each index. It also documents their limitations and drawbacks. This mapping exercise is useful for policymakers, researchers, and practitioners as it offers a detailed and compact overview of where we are and what we still need to account for when measuring sustainability.

Quantum Artificial Intelligence Vijayarangan Natarajan, 2025-09-07 This book presents the result of an innovative challenge to create a systematic literature overview driven by machine generated content Questions and related keywords were prepared for the machine to query discover collate and structure by Artificial Intelligence AI clustering The AI based approach seemed especially suitable to provide an innovative perspective as the topics are indeed both complex interdisciplinary and multidisciplinary for example climate planetary and evolution sciences Springer Nature has published much on these topics in its journals over the years so the challenge was for the machine to identify the most relevant content and present it in a structured way that the reader would find useful The automatically generated literature summaries in this book are intended as a springboard to further discoverability They are particularly useful to readers with limited time looking to learn more about the subject quickly and especially if they are new to the topics Springer Nature seeks to support anyone who needs a fast and effective start in their content discovery journey from the undergraduate student exploring interdisciplinary content to Master or PhD thesis developing research questions to the practitioner seeking support materials this book can serve as an inspiration to name a few examples It is important to us as a publisher to make the advances in technology easily accessible to our authors and find new ways of AI based author services that allow human machine interaction to generate readable usable collated research content

The Computable City Michael Batty, 2024-03-26 How computers simulate cities and how they are also being embedded in cities changing our

behavior and the way in which cities evolve At every stage in the history of computers and communications it is safe to say we have been unable to predict what happens next When computers first appeared nearly seventy five years ago primitive computer models were used to help understand and plan cities but as computers became faster smaller more powerful and ever more ubiquitous cities themselves began to embrace them As a result the smart city emerged In *The Computable City* Michael Batty investigates the circularity of this peculiar evolution how computers and communications changed the very nature of our city models which in turn are used to simulate systems composed of those same computers Batty first charts the origins of computers and examines how our computational urban models have developed and how they have been enriched by computer graphics He then explores the sequence of digital revolutions and how they are converging focusing on continual changes in new technologies as well as the twenty first century surge in social media platform economies and the planning of the smart city He concludes by revisiting the digital transformation as it continues to confound us with the understanding that the city now a high frequency twenty four hour version of itself changes our understanding of what is possible
