Alinda, Ms. Camelia Minoiu, José-Luis Peydró, Andrea Presbitero, 2015-12-23 The transmission of monetary policy to credit aggregates and the real economy can be impaired by weaknesses in the contracting environment shallow financial markets and a concentrated banking system We empirically assess the bank lending channel in Uganda during 2010-2014 using a supervisory dataset of loan applications and granted loans Our analysis focuses on a short period during which the policy rate rose by 1 000 basis points and then came down by 1 200 basis points We find that an increase in interest rates reduces the supply of bank credit both on the extensive and intensive margins and there is significant pass through to retail lending rates We document a strong bank balance sheet channel as the lending behavior of banks with high capital and liquidity is different from that of banks with low capital and liquidity Finally we show the impact of monetary policy on real activity across districts depends on banking sector conditions Overall our results indicate significant real effects of the bank lending channel in developing countries
