Chin, 2020-10-26 Savage Exchange explores the politics of representation during the Han dynasty 206 BCE 220 CE at a pivotal moment when China was asserting imperialist power on the Eurasian continent and expanding its local and long

distance Silk Road markets Tamara T Chin explains why rival political groups introduced new literary forms with which to represent these expanded markets To promote a radically quantitative approach to the market some thinkers developed innovative forms of fiction and genre In opposition traditionalists reasserted the authority of classical texts and advocated a return to the historical ethics centered marriage based agricultural economy that these texts described The discussion of frontiers and markets thus became part of a larger debate over the relationship between the world and the written word These Han debates helped to shape the ways in which we now define and appreciate early Chinese literature and produced the foundational texts of Chinese economic thought Each chapter in the book examines a key genre or symbolic practice philosophy fu rhapsody historiography money kinship through which different groups sought to reshape the political economy By juxtaposing well known texts with recently excavated literary and visual materials Chin elaborates a new literary and cultural approach to Chinese economic thought Co Winner 2016 Harry Levin Prize American Comparative Literature Association Honorable Mention 2016 Joseph Levenson Book Prize Pre 1900 Category China and Inner Asia Council of the Association for Asian Studies *The German Demonstratives* Lin Lin, 2019-12-06 This book explores analyzes and compares the use of German and Chinese demonstratives Discourse and textual uses of the forms are considered as well as their locative and temporal uses The author observes that in both languages the demonstratives can be used to refer to referents However she departs from the common assumption that proximal demonstratives refer to entities or places close to the speaker while non proximal demonstratives refer to entities or places far from the speaker Having analyzed a representative sampling consisting of a German text and a Chinese text the author argues that both German and Chinese proximal demonstratives can signal the meaning of HIGH DEIXIS in a system of DEIXIS in the Columbia School of linguistics framework whereas their non proximal demonstratives can signal the meaning of LOW DEIXIS In addition Chinese demonstratives can be used under more circumstances than German demonstratives due to the lack of articles in Chinese The author also argues that Cognitive Linguistic analysis is more helpful for new language learners whereas the Columbia School of linguistics may be better suited to advanced learners who wish to know more about the intrinsic differences between words with similar meanings and uses This book aims to help German learners better understand the German reference system Readers with a Chinese language background will definitely benefit more from the book as well as Chinese learners with a German language background For pure linguistic enthusiasts and multi linguals the book offers an extensive introduction to the Columbia School of linguistics and can open a new horizon for learning a new language comparatively

To Steal a Book Is an Elegant Offense William P. Alford, 1995-03-01 This study examines the law of intellectual property in China from imperial times to the present It draws on history politics economics sociology and the arts and on interviews with officials business people lawyers and perpetrators and victims of piracy The author asks why the Chinese with their early bounty of scientific and artistic creations are only now devising legal protection for such endeavors and why

such protection is more rhetoric than reality on the Chinese mainland In the process he sheds light on the complex relation between law and political culture in China The book goes on to examine recent efforts in the People s Republic of China to develop intellectual property law and uses this example to highlight the broader problems with China s program of law reform **Michigan Law Review** ,2008 **The Global Governance of Knowledge** Peter Drahos,2010-01-28 Patent offices around the world have granted millions of patents to multinational companies Patent offices are rarely studied and yet they are crucial agents in the global knowledge economy Based on a study of forty five rich and poor countries that takes in the world s largest and smallest offices Peter Drahos argues that patent offices have become part of a globally integrated private governance network which serves the interests of multinational companies and that the Trilateral Offices of Europe the USA and Japan make developing country patent offices part of the network through the strategic fostering of technocratic trust By analysing the obligations of patent offices under the patent social contract and drawing on a theory of nodal governance the author proposes innovative approaches to patent office administration that would allow developed and developing countries to recapture the public spirit of the patent social contract **Night Club & Bar** ,1994 **Hits and Misses in the Baseball Draft** Alan Maimon,Chuck Myron,2014-02-12 If unpredictability is so much of what makes sports compelling the baseball draft might be the best place to look This book explores the intricate uncertainties of the draft and the people who face it Since the modern draft began in 1965 major league teams have attempted with varying degrees of success to identify and develop stars of the future Whether because of injury poor performance or mental and physical struggles a large percentage of the most ballyhooed prospects never reach the game s highest level Though teams have improved in recent years at turning top picks into major leaguers the baseball draft is still centered on educated guesswork This book explains why
