Teaching Primary Humanities Russell Grigg, 2014-05-22 As primary subjects are increasingly being taught on an interdisciplinary level Russell Grigg and Sioned Hughes have created an innovative new text Teaching Primary Humanities This new text explores current debate encourages reflection and provides clear guidance on planning teaching and assessing the humanities from the Early Years to Key Stage 2 Through a blend of theory and real life examples Grigg and Hughes demonstrate the contribution that history geography and religious education can make to enhancing children s thinking literacy numeracy and ICT skills Whether you are a trainee or a practitioner this book will develop your knowledge of how young children s understanding of place time and community can be fostered through a play based curriculum It will also benefit teachers of older children looking to encourage more independent learning in their schools About the authors Dr Russell Grigg is Head of the South West Wales Centre of Teacher Education He is a trained primary inspector for England and Wales He has written widely in the field of history and primary education including Wales in the Victorian Age and Becoming an Outstanding Primary Teacher Dr Sioned Hughes is Senior Lecturer in Initial Teacher Training at the South West Wales Centre of Teacher Education She has published many educational materials especially in primary geography Her work on Patagonia was recognised by the Welsh Books Council as the Bestselling Children s Book in 2011 **Plutocracy in America** Ronald P. Formisano, 2015-09-15 A hard hitting analysis of how the disparity between wealth and poverty undermines the common good The growing gap between the most affluent Americans and the rest of society is changing the country into one defined more than almost any other developed nation by exceptional inequality of income wealth and opportunity This book reveals that an infrastructure of inequality both open and hidden obstructs the great majority in pursuing happiness living healthy lives and exercising basic rights A government dominated by finance corporate interests and the wealthy has undermined democracy stunted social mobility and changed the character of the nation In this tough minded dissection of the gulf between the super rich and the working and middle classes Ronald P Formisano explores how the dramatic rise of income inequality over the past four decades has transformed America from a land of democratic promise into one of diminished opportunity Since the 1970s government policies have contributed to the flow of wealth to the top income strata The United States now is more a plutocracy than a democracy Formisano surveys the widening circle of inequality s effects the exploitation of the poor and the middle class and the new ways that predators take money out of Americans pockets while passive federal and state governments stand by This data driven book offers insight into the fallacy of widespread opportunity the fate of the middle class and the mechanisms that perpetuate income disparity **Routledge Handbook of Transport in Asia** Junyi Zhang, Cheng-Min Feng, 2018-06-12 Asian transportation systems and services as well as their usage are fraught with challenges This handbook therefore seeks to examine the possible solutions to the problems faced by the region It illustrates the history of transportation development in Asia and provides a comprehensive

overview of research on urban and intercity transport Presenting an extensive literature review and detailed summaries of the major findings and methodologies this book also offers suggestions for future research activities from top level international researchers Written from an interdisciplinary perspective the topics covered include Transportation systems across Asia Traffic accidents Air pollution Land use and logistics Transport governance Considering the population and economic development scale as well as the diverse cultures of Asia the Routledge Handbook of Transport in Asia will be a valuable resource for students and scholars of transportation Asian development and Asian Studies in general

Burying Mussolini Paolo Heywood, 2024-12-15 Burying Mussolini addresses the global resurgence in authoritarian and nationalist populism and its connection with valorizations of ordinary life Predappio is the birthplace and burial site of Benito Mussolini and Italy's premier neo fascist tourist site with hundreds of thousands of fascist sympathizers descending on the town annually But Paolo Heywood asks what of the people who actually live there What does ordinary life look like in the shadow of Mussolini's grave As politicians commentators and social scientists seek to understand what lies behind new forms of political authoritarianism and whether and how they resemble movements once thought consigned to the past Burying Mussolini narrates how people in Predappio cope with the dark heritage of their home by carefully crafting a sense of ordinariness that is itself inflected by ghosts of their fascist past

A History of UNESCO Poul Duegaard, 2016-04-12 The mission UNESCO as defined just after the end of World War II is to build the defenses of peace in the minds of men In this book historians trace the routes of selected UNESCO mental engineering initiatives from its headquarters in Paris to the member states to assess UNESCO's global impact

Putin's Wars Marcel H. Van Herpen, 2014-02-27 This book offers the first systematic analysis of Putin's two wars placing the Second Chechen War and the War with Georgia of 2008 in their broader historical contexts Drawing on extensive original Russian sources Marcel H Van Herpen analyzes in detail how Putin's wars were prepared and conducted and why they led to allegations of war crimes and genocide He shows how the conflicts functioned to consolidate and legitimate Putin's regime and explores how they were connected to a third hidden internal war waged by the Kremlin against the opposition The author convincingly argues that the Kremlin relying on the secret services the Orthodox Church the Kremlin youth Nashi and the rehabilitated Cossacks is preparing for an imperial revival most recently in the form of a Eurasian Union An essential book for understanding the dynamics of Putin's regime this study digs deep into the Kremlin's secret long term strategies Readable and clearly argued it makes a compelling case that Putin's regime emulates an established Russian paradigm in which empire building and despotic rule are mutually reinforcing As the first comprehensive exploration of the historical antecedents and political continuity of the Kremlin's contemporary policies Van Herpen's work will make a valuable contribution to the literature on post Soviet Russia and his arguments will stimulate vigorous debate

Collecting Activism. Archiving Occupy Wall Street Kylie Message, 2019-09-10 Collecting Activism Archiving Occupy Wall Street explores the material collections produced by participants of Occupy Wall Street in 2011 that

bear witness to the experience and agency of the 99% Examining processes of collection development as a lens through which to investigate the sociology of protest and reform movements the book questions what contribution a dual study of the material culture of dissent and the production of a collection hosting the material culture of dissent might offer to a range of disciplines and practices It asks if and how a collections based study can test the propositions tactics and limits of activism from archival museological and political perspectives Collecting Activism Archiving Occupy Wall Street draws from interdisciplinary fields including museum studies collection studies archive studies cultural studies and public history It will be a valuable resource for scholars and practitioners engaged with contemporary cause based collecting activist archiving public history and the cultural politics and sociology of social reform movements It models strategies for activating historical archives and collections based data and for engaging with autoethnographic records to represent and analyze the material residue of protest and reform movements today

Accomplishing Climate Governance Harriet Bulkeley, 2015-09-25 This book provides a new approach to thinking about the politics and geographies of climate governance It argues that in order to understand the nature and potential of the range of new responses to climate change emerging at multiple scales we need to examine how governance is accomplished how it is undertaken practised and contested Through a range of case studies drawn from communities corporations and local government the book examines how climate change comes to be governed and made to matter as an issue with which diverse publics should be concerned It concludes that rather than seeking the solution to climate change once and for all we need to engage with the ways in which we can channel our intentions to ameliorate the climate problem to more progressive ends The book will be of interest to researchers advanced students and policy makers across the social sciences

Professional Uncertainty, Knowledge and Relationship in the Classroom Joseph Mintz, 2014-06-27 The extent to which teachers should make use of theoretical and expert knowledge as opposed to tacit experiential knowledge and how these might be combined is a perennial issue in discussions on pedagogy This book addresses these debates through a creative development of the concept of productive uncertainty Using case studies focusing on teachers working with children with autism a particularly fertile crucible for considering uncertainty the book explores how the radical 20th century psychoanalyst Wilfred Bion's epistemological approach to uncertainty can be used to re frame Donald Schön's concept of reflection in action offering a new perspective on the practice of teachers and other caring professionals Several areas of potential uncertainty are identified including uncertainty relating to areas of practice including diagnosis the relationship between expert knowledge and practice the implications of autism for autonomy and agency and uncertainties in relation to the understanding of and use of new technologies A strong argument is made based on both theoretical and empirical grounds that in juggling between theoretical and tacit knowledge in the classroom there is more to be gained by staying with the struggle with uncertainty than by fleeing from it too early into the promise of expert solutions Consideration is also given to the relative importance of specific theoretical training for teachers both in general

and in relation to working with children with special educational needs in the context of international and UK policy developments in this area This book will be of key value to researchers and postgraduates in the fields of education studies teacher thinking and research psychoanalytically informed psychosocial studies as well as to practitioners working in special educational needs autism education [Australia and China Perspectives on Urban Regeneration and Rural Revitalization](#) Raffaele Pernice,Bing Chen,2024-04-30 This edited volume reviews important contemporary issues through relevant case studies and research in China and Australia such as the challenges posed by climate change the development of eco urban design research on sustainable habitats and the relationship between ecology green architecture and city regeneration as well as in general the future of the city in the new millennium The authors represent a broad selection of international experts young scholars and established academics who discuss themes related to urban rural destruction and economic and spatial regeneration techniques the sustainable reconversion of natural landscapes and eco urban design in the context of the current evolution of architectural and urbanism practice The book aims to explain the conditions in which the contemporary debate about urban regeneration and rural revitalisation has developed in Australia and China presented by different theoretical and methodological perspectives It also provides a multifaceted and critical analysis of relevant case studies and urban experiences in Australia and China focusing on environmental disruption resized urban interventions and the need for more efficient and sustainable forms of regeneration and urban renewal practice in urban rural contexts This book will be an invaluable resource for architects planners architectural and urban historians geographers and scholars interested in modern Australian and Chinese architecture and urbanism **Too Close to Ignore** Mark Moran,Jodie Curth-Bibb,2020-03-31 Less than five kilometres from Australia s most northern islands in the Torres Strait lies the southern coast of Papua New Guinea PNG The people living on the PNG side of the border along the South Fly coast live in abject poverty with a near total absence of services and infrastructure The disparity in income housing and health outcomes when compared with their nearby neighbours and relatives in the Torres Strait Islands is extreme The border is the focus of a range of interventions by the Australian and Queensland governments including border protection quarantine marine resource management and infectious disease control including an alarming outbreak of multi drug resistant tuberculosis Restrictions are increasing on trading fishing and access to Australian services However questions remain as to whether this focus is having unintended consequences increasing the destitution and frustration on the PNG side in turn exacerbating the security threat to Australia And as the Australian border hardens the Indonesian border beckons This book presents the results of three years of research into the unique social and political geography of the borderland The Torres Strait Treaty between Australia and PNG serves to construct a complex institutional layering a tiered economy and a hierarchy of identities between those South Fly villagers who have rights under the Treaty to travel into Australia and those who do not This creates a politics of expectation and frustration that permeates everyday life along the South Fly coast through which development projects must

navigate **UAE** Melodena Stephens, Immanuel Azaad Moonesar, Raed Awamleh, Rhys Rowland-Jones, 2017-06-16 This book can be used to teach public policy and help international industry leaders and academics understand the context of UAE and the role it plays in the global arena This project is a series by the Academy of International Business MENA chapter supported by the Mohammed Bin Rashid School of Government Dubai **Changing Lanes** Joseph F.C. Dimento, Cliff Ellis, 2014-08-29 The story of the evolution of the urban freeway the competing visions that informed it and the emerging alternatives for more sustainable urban transportation Urban freeways often cut through the heart of a city destroying neighborhoods displacing residents and reconfiguring street maps These massive infrastructure projects costing billions of dollars in transportation funds have been shaped for the last half century by the ideas of highway engineers urban planners landscape architects and architects with highway engineers playing the leading role In **Changing Lanes** Joseph DiMento and Cliff Ellis describe the evolution of the urban freeway in the United States from its rural parkway precursors through the construction of the interstate highway system to emerging alternatives for more sustainable urban transportation DiMento and Ellis describe controversies that arose over urban freeway construction focusing on three cases Syracuse which early on embraced freeways through its center Los Angeles which rejected some routes and then built I 105 the most expensive urban road of its time and Memphis which blocked the construction of I 40 through its core Finally they consider the emerging urban highway removal movement and other innovative efforts by cities to re envision urban transportation

updates and summarizes the state of the art for connections in the precast and prestressed concrete industry for both structural and architectural products

8 1 heating curves and phase changes problems - Mar 10 2023

web answer click here to see a video of the solution problem 8 1 4 8 1 4 titanium tetrachloride TiCl_4 has a melting point of 23

$^{\circ}\text{C}$ and has a ΔH_{fusion} 9 37 kJ/mol how much energy is required to melt 263 1 g TiCl_4 for TiCl_4 which will likely have the larger magnitude ΔH_{fusion} or $\Delta H_{\text{vaporization}}$ explain your reasoning answer a

heating and cooling curves overview examples expii - Sep 04 2022

web heating and cooling curves are graphs they plot a substance's temperature y axis against heat x axis for heating curves

we start with a solid and add heat energy for cooling curves we start with the gas phase and remove heat energy cooling and

heating curves have five segments let's study each one by looking at heating ice to

heating cooling curves review 52 plays quizizz - Apr 30 2022

liquid as it begins to freeze e f freezing liquid water f g cooling ice

worksheet for heating curve with answers docsity - Oct 05 2022

web download worksheet for heating curve with answers and more chemistry exercises in pdf only on docsity heating curve worksheet if this curve is read from right to left it is a cooling curve the diagram below illustrates the steps involved to convert 10g of solid ice at 20 c to 10g of gaseous steam at 140 c a

heating curves and cooling curves youtube - Jul 02 2022

web feb 17 2015 in this video i will explain the concept of heating and cooling curves as they applies to water and ethanol

heating and cooling curves flexi homework help answers - Dec 07 2022

web get comprehensive homework help for heating and cooling curves browse through questions students have asked on heating and cooling curves and see how flexi helped them with answers and clear explanation

heating and cooling curves worksheet live worksheets - Apr 11 2023

web jul 9 2021 this worksheet is seeks to link the changes of state of matter and how particles move when heat is added or removed and represented as a graph

answer heating and cooling curves google sites - Jun 01 2022

web answer a foam cup is a better insulator than a plastic cup and a plastic cup is a better insulator than a glass cup

8 1 heating curves and phase changes chemistry libretexts - Aug 15 2023

web describe the processes represented by typical heating and cooling curves and compute heat flows and enthalpy changes accompanying these processes explain the construction and use of a typical phase diagram

13 18 heating and cooling curves chemistry libretexts - Jul 14 2023

web aug 8 2022 heating curves imagine that you have a block of ice that is at a temperature of 30 text o text c well below its meltingpoint the ice is in a closed container as heat is steadily added to the ice block the water molecules will begin to vibrate faster and faster as they absorb kinetic energy

chemistry heating and cooling curves worksheet answers - Dec 27 2021

web stearic acid c17h35cooh is cooled at a constant rate the temperature of the sample is recorded at 2 minute intervals in the data table below read more heating cooling curvesheating cooling curves page 1 heating cooling curves a the following graph is a heating curve showing the addition of heat at a constant rate of 500 0 joules minute

what is the aim of a heating and cooling curve sage answer - Feb 26 2022

web mar 26 2020 what is the aim of a heating and cooling curve a heating curve of a substance gives the changes in temperature as we move from a solid to a liquid to a gas a cooling curve gives the changes in temperature as we move from gas to liquid to solid what is the aim of the heating curve of water

heating and cooling curves example 1 channels for pearson - Feb 09 2023

web if we re dealing with a gas we d still use two equals n cac would be the specific heat of gasses water and then here it would be the specific heat of ice now again going back to the question we re looking for liquid water so that would mean the answer is option c line segment cd would have the specific heat of liquid water

unit 8 heating cooling curves question bank miss - May 12 2023

web 1 the heating curve below represents a sample of a substance starting as a solid below its melting point and being heated over a period of time which statement describes the energy of the particles in this sample during interval de a both potential energy and average kinetic energy increase
