**Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1977      Recording for the Blind & Dyslexic, ... Catalog of Books , 1996      Computer-assisted Investigative Reporting Margaret H. DeFleur, 2013-11-26

Conducting computer analyses for the purposes of revealing information of significance to the press represents an extension of one of the most important forms of American journalism into the contemporary era of new technologies Investigative reporting had its start with the establishment of the metropolitan newspaper during the early decades of the 1900s At the time it was a continuation of the evolving tradition of freedom of the press that had characterized American political life since colonial times As it developed investigative reporting stressed facts rather than the opinions of the editor or reporter In turn that tradition had its own intellectual roots Today computer assisted investigative reporting CAIR extends that marketplace of ideas into systematic examinations of the electronic records of government In addition computer analyses of other kinds of information systematically gathered by journalists can provide the press with insights into trends and patterns unlikely to be revealed by other means This unique volume addresses procedures and issues in investigative journalism that have not been explained in other publications It sets forth for the first time a detailed and specific methodology for conducting computer assisted investigative analyses of both large and small scale electronic records of government and other agencies That methodology consists of the logic of inquiry strategies for reaching valid conclusions and rules for reporting what has been revealed by the analyses to the public in clear ways Such systematic methodologies are essential in social and other sciences and the development of a counterpart for investigative journalism has been badly needed That systematic methodology is developed within a context that explains the origin and major characteristics of those elements that have come together in American society to make computer assisted investigative reporting both possible and increasingly a part of standard newsroom practices These include the development of traditional investigative journalism the evolution of computer technology the use of computers by government to keep records the legal evolution of freedom of information laws the rapid adoption of computers in newsrooms the increasing importance of precision journalism and the sharp increase in recent times of computer assisted investigative reporting by American newspapers both large and small The issues addressed in this book are discussed in a very readable context with an abundance of examples and illustrations drawn from the real world of journalism as it is practiced daily in newsrooms around the country Explanations of concepts principles and procedures are set forth in layperson s terms that require very little in the way of knowledge of computers or statistical methods

**Uniform Trade List Annual** , 1977      **Research in the Social Scientific Study of Religion, Volume 14** Ralph L. Piedmont, David O. Moberg, 2021-10-01 Research in the Social Scientific Study of Religion RSSSR publishes reports of innovative studies that pertain empirically or theoretically to the scientific study of religion including spirituality regardless of their academic discipline or professional orientation It is academically eclectic not restricted to any one particular

theoretical orientation or research method Most articles report the findings of quantitative or qualitative investigations but some deal with methodology theory or applications of social science studies in the field of religion

**Piaget and His School** C. Zwingmann, B. Inhelder, H.H. Chipman, 2012-12-06 Inhelder in her introduction The reason for this unity is that explanatory adequacy can be attained only by exploring the formative and constructive aspects of development To explain a psychologic reaction or a cognitive mechanism at all levels including that of scientific thought is not simply to describe them but to comprehend the processes by which they were formed failing that one can but note results without grasping their meaning

JEAN PIAGET VI Man distinguishes himself from other creatures primarily by his abstract reasoning capacity and his ability to communicate his knowledge by highly complex symbolic processes What is called humanity and progress is to a large degree a measure of his consciousness and the deployment of his creative potentials There are few scientists who have explored the universe of cognition and contributed to the understanding of the realm of knowledge with greater genius care and scientific intuition than Jean Piaget and his longtime collaborator Barbel Inhelder Professor Inhelder and her assistant Dr Harold Chipman realized this book in spite of the heavy load of research teaching and administrative duties in a rapidly expanding Institute It is therefore a particular pleasure for me to present this book

Ontology after Philosophical Psychology Michela Bella, 2019-08-21 Ontology after Philosophical Psychology addresses the question of William James's continuity of consciousness with a view to its possible actualizations In particular Michela Bella critically delineates James's discourse In the wake of Darwin's theory of evolution at the end of the nineteenth century James's reflections emerged in the field of physiological psychology where he developed for the case for a renewed epistemology and a new metaphysical framework to help us understand the most interesting theories and scientific discoveries about the human mind Bella's analysis of the theme of continuity makes it possible to appreciate both historically and theoretically the importance of James's gradual transition from making observations of experimental psychology on the continuity of thought to developing an epistemological and ontological argument that continuity is a characteristic of experience and reality This analysis makes it possible both to clarify James's position in relation to his historical context and to highlight the most original results of his work

Adult Education and Lifelong Learning Peter Jarvis, 2012-12-06 Now in its fourth edition Adult Education and Lifelong Learning is well established and is regarded as the most widely used text about adult education Fully revised and updated with substantial additional material this new edition takes account of many changes which have occurred in the field of adult education With new features for students and researchers updates incorporate material on the ethical and political implications of lifelong learning detailed information on changes relating to globalisation increased

**Researching Children and Childhoods** Sarah Richards,Sarah Coombs,2025-07-10 Junior researchers in the field of childhood studies are often faced with many challenges that accompany research with young participants Methodological concepts such as research relationships positionality self disclosure and reflexivity can sometimes become subordinate to more practical and procedural concerns *Researching Children and Childhoods* frames these themes not as problems but as opportunities to deepen and strengthen research discussions and analysis Providing students with a guide to support their ventures into research with children and young people this book offers practical advice on writing a thesis dissertation and will enable readers to confidently reflect on the ethical issues embedded in their own projects and recognise them as opportunities for discussion within their dissertations or thesis demystify the role of methodologies and position them as essential tools for their research consider the efficacy of concepts such as agency autonomy participation subjectivity and voice as ways of understanding childhood and children s lived experiences use ideas such as positionality self disclosure and category entitlement to recognise the integral role of researcher identity and relationships in the construction of knowledge use I authoritatively when writing about their own research without reducing content to descriptive opinion based discussions situate their research by exploring the context in which the research takes place and the power relations embedded within participants and researcher relationships Each chapter includes a variety of researcher experiences vignette examples and specific activities aimed at applying the key themes represented in this volume into research dissertations

**Research Methods and Statistics in Psychology** Bernard C. Beins, Maureen A. McCarthy, 2018-12-13 This seamless introduction to statistics and research methods identifies various research areas and analyzes how one approaches them statistically *Handbook of Workplace Spirituality and Organizational Performance* Giacalone, 2015-05-18 An explanation of how and why the economic downturn of 2007 became the Great Recession of 2008 and 2009 It explores the root causes of the cycle of boom and bust of the economy It describes social equity in terms of its arguments and claims in political economic and social circumstances

**Constraints of Agency** Craig W. Gruber, Matthew G. Clark, Sven Hroar Klempe, Jaan Valsiner, 2014-11-03 This book explores the basic concept of agency and develops it further in psychology using it to better understand and explain psychological processes and behavior More importantly this book seeks to put an emphasis on the role of agency in four distinct settings history of psychology neuroscience psychology of religion and sociocultural theories of co agency In Volume 12 of the *Annals of Theoretical Psychology* the contributors explore a number of new ways to look at agency in psychology This volume seeks to develop a systematic theory of axioms for agency It describes implications for research and practice that are founded on an

understanding of the person as an actor in the world This book also has implications for research and practice across psychology's sub fields uniting the discipline through an agentic view of the person      *Invitation to Psychology* Carole Wade, Carol Tavris, 2006-03 For undergraduate introductory courses in psychology Through lively writing and stimulating examples the text invites students to actively explore the field of psychology and the fundamentals of critical and scientific thinking *Invitation to Psychology* presents the science of psychology according to six areas of the student's experience Your Self Your Body Your Mind Your Environment Your Mental Health and Your Life This unique organization engages students from the very beginning and gives them a framework for thinking about human behavior Incorporating many of the active learning and critical thinking features from their best selling comprehensive text a balance of classic and contemporary research and thorough integration of the psychology of women and men of all cultures students will learn much to take with them *Invitation to Psychology 3e STUDY EDITION* contains newly added CONCEPT MAPS to the end of the text These visual summaries address key objectives in every chapter in a highly visual manner The *STUDY EDITION* also contains a laminated *Introductory Psychology* study card with helpful definitions key topics and important facts      **An Arts Therapeutic Approach to Maternal Holding** Ariel Moy, 2021-08-08 Little research has explored the everyday simple and long term experience of maternal holding particularly after the first year of a child's life The research that has been undertaken commonly examines holding through the lens of attachment with a focus on the impact of holding upon the child Employing an arts based collaborative inquiry approach participants stories of holding as well as the author's own convey the significant maternal experiences of holding their children over individual arts therapeutic sessions Optimal moments of holding included strange powerful and meaningful experiences of expansion into self in relationship Attention is drawn to the ways in which holding can alert us to the current state of mother child relationships how we understand story and structure those relationships and the ways in which we can attend to holding in order to develop deeply satisfying experiences of a mother child us *An Arts Therapeutic Approach to Maternal Holding* aims to draw attention to the intersubjective qualities of the mother child relationship explore why holding matters and offer suggestions for therapeutic practice This book is essential reading for therapeutic practitioners and those in allied health fields who work with mothers and children      **Handbook of Drug Abuse Prevention** Zili Sloboda, William J. Bukoski, 2007-08-06 There are a number of reasons why this book is important First there is no one source that summarizes what we know about the prevention of substance abuse from the research field so the book serves as a repository of accumulated knowledge on prevention theory intervention design and development and prevention research methodology Second as an evolving field prevention science has only begun to assert itself in both the arenas of practice and policy The formation of the Society for Prevention Research in 1991 was the first recognition that a science of prevention existed and required a separate forum to present the rapidly growing content of the field for discussion and review Finally there is a need to establish a baseline a reference point against which progress in the

field of prevention science can be assessed This book serves all of these purposes The idea for this book grew from the observation in the early 1990s that after decades of attempts to develop effective interventions to prevent drug use among children and adolescents in the United States that we were finally having success particularly in addressing the initiation of use These successes are the result of research that has provided a better understanding of the factors and processes associated with the onset of substance use
