Handbook of Simplified Practice for Traffic Studies Duane Eugene Smith, 2002 The Iowa Highway Research Board has identified the development of a simplified handbook of transportation studies as a high priority for the state of Iowa The Center for Transportation Research and Education CTRE at Iowa State University was chosen to develop such a handbook A well executed well documented study is critical in the decision making process for many transportation related projects and in reporting to elected officials and members of the community As more research is conducted in the area of transportation study procedures in many cases have become more complex It is often difficult for local jurisdictions with limited staff training experience and time availability to perform these studies The most commonly used publication for traffic studies is geared toward transportation professionals and

professional engineers That defining document Manual of Transportation Studies Institute of Transportation Engineers 2000 is over 500 pages and includes several dozen types of transportation studies Many of the transportation studies described in the manual are rarely if ever used by local jurisdictions Further those studies that are frequently used are at times very complex and possibly very costly to perform exactly as described Local jurisdictions without the staff expertise to understand and apply the manual s various studies have a need for a simplified handbook of procedures to perform common traffic studies themselves or properly define a scope of work to hire a consultant to perform the studies This handbook describes simplified procedures that are easy to apply and are written for all potential users civil engineers and traffic engineers public works managers city managers and attorneys and the general public *DOT-TSC-OST. ,19??* Department of Transportation and Related Agencies Appropriations for Fiscal Year 1999 United States.
