

Lazarus and folkman's transactional model of stress and coping (1984)

STRENGTHS	LIMITATIONS
Unlike GAS it does not overlook cognitive processes and individual differences	Hard to test through experimental research
Appraisals help explain how different individuals respond to the same stress differently	Subjective in nature due to complexity of individual responses.
Provides coping strategies	Some argue we don't need to appraise a situation in order for it to be stressful, unconsciously we can be stressed about situations
