Department of Defence, 2016 *Army*, 1980 **Defense of Japan**, 1998 *Tao of Soldiering* Nihar Kuanr, 2020-03-30 Soldiering is all about the growth and development of human potential in the military organization The approach to soldiering in China is apparently distinct as compared to Indian or Western military and the shaping of soldiery in China has taken a very unique and somewhat enigmatic course In the context of PLA in the ongoing reform era a clear shift in the approach to HRM is apparent One of the most important objectives of the ongoing reforms and restructuring of PLA is to appreciably augment its potential and efficiency for the effective prosecution of Integrated Joint operations IJO for winning Local Wars under Informationised Condition LWUIC This book attempt has been made to take a holistic look at soldiering and development of human potential in PLA thus progressing understanding in the broadly interpreted field of HRM in the context of the Chinese military The author argues that PLA has been adopting a very systematic methodical and focussed approach towards identifying the key issues and addressing them in a time bound manner to enhance the quality of its personnel to include the enlisted personnel NCOs officers and higher leadership However success or failure of HR policies depends as much on several tangible factors educational qualification technological prowess economic and social background as on various intangible aspects influence of culture belief system traditional practices political and ideological factors impinging on the morale motivation and value system The book would enable interested readers to comprehend and grasp the nuances of the development of human potential in the military in general and PLA in specific Various HRD themes like organizational culture leadership efficient decision making etc analyzed in the book can find application in general context as well *Dew of Death* Joel A. will always know how to make lewisite the Dew of Death but that does not mean that we should or be compelled to accept such weapons in our lives from the Foreword by Richard Butler former head of UN Special Commission to Disarm Iraq In 1919 when the Great War was over the New York Times reported on a new chemical weapon with the fragrance of geranium blossoms a poison gas that was the climax of this country s achievements in the lethal arts The name of this substance was lewisite and this is its story the story of an American weapon of mass destruction Discovered by accident by a graduate student and priest in a chemistry laboratory at the Catholic University of America in Washington D C lewisite was developed into a weapon by Winford Lewis who became its namesake working with a team led by James Conant later president of Harvard and head of government oversight for the U S s atomic bomb program the Manhattan Project After a powerful German counterattack in the spring of 1918 the government began frantic production of lewisite in hopes of delivering 3 000 tons of the stuff to be ready for use in Europe the following year The end of war came just as the first shipment was being prepared It was dumped into the sea but not forgotten Joel A Vilensky tells the intriguing story of the discovery and development of lewisite and its curious history During World War II the United States produced more than 20 000 tons of lewisite testing it on soldiers and secretly dropping it from airplanes In the end the substance was abandoned as a weapon because it was too unstable under most combat conditions But a weapon once discovered never disappears It was used by Japan in Manchuria and by Iraq in its war with Iran The Soviet Union was once a major manufacturer Strangely enough although it was developed for lethal purposes lewisite led to an effective treatment for a rare neurological disease
