*Buddhist Modernities* Hanna Havnevik, Ute Hüsken, Mark Teeuwen, Vladimir Tikhonov, Koen Wellens, 2017-02-17

The transformations Buddhism has been undergoing in the modern age have inspired much research over the last decade. The main focus of attention has been the phenomenon known as Buddhist modernism, which is defined as a conscious attempt to adjust Buddhist teachings and practices in conformity with the modern norms of rationality, science or gender equality. This book advances research on Buddhist modernism by attempting to clarify the highly diverse ways in which Buddhist faith, thought and practice have developed in the modern age, both in Buddhist heartlands in Asia and in the West. It presents a collection of case studies that taken together demonstrate how Buddhist traditions interact with modern phenomena such as colonialism and militarism, the market economy, global interconnectedness, the institutionalization of gender equality and recent historical events such as deindustrialization and the socio-cultural crisis in post-Soviet Buddhist areas. This volume shows how the reinvention of traditions constitutes an important pathway in the development of Buddhist modernities and emphasizes the pluralistic diversity of these forms in different settings.

**Design for a Vulnerable Planet** Frederick Steiner, 2011-05-16

We inhabit a vulnerable planet. The devastation caused by natural disasters such as the southern Asian tsunami, Hurricanes Katrina and Ike, and the earthquakes in China's Sichuan province, Haiti and Chile, as well as the ongoing depletion and degradation of the world's natural resources caused by a burgeoning human population, have made it clear that business as usual is no longer sustainable. We need to find ways to improve how we live on this planet while minimizing our impact on it. *Design for a Vulnerable Planet* sounds a call for designers and planners to go beyond traditional concepts of sustainability toward innovative new design that fosters regeneration and resilience. Drawing on his own and others' experiences across three continents, Frederick Steiner advocates design practice grounded in ecology and democracy and informed by critical regionalism and reflection. He begins by establishing the foundation for a more ecological approach to planning and design, adopting a broad view of ecology as encompassing human and natural, urban and wild environments. Steiner explores precedents for human ecological design provided by architect Paul Cret, landscape architect Ian McHarg and developer George Mitchell while discussing their planning for the University of Texas campus, the Lake Austin watershed and The

Woodlands Steiner then focuses on emerging Texas urbanism and extends his discussion to broader considerations beyond the Lone Star State including regionalism urbanism and landscape in China and Italy He also examines the lessons to be learned from human and natural disasters such as 9 11 Hurricane Katrina and the BP oil spill Finally Steiner offers a blueprint for designing with nature to help heal the planet s vulnerabilities
