

## Rolling toy

- Prepare a sample toy made of a can instead of the transparent plastic container. This way the students cannot see the mechanism inside the can. Rotate the barbecue stick beforehand before asking them what they think will happen to the can when placed on the floor.
- After the activity, ask the students to demonstrate the game they played using a rubber band. Ask them how the rubber bands 'store' energy and what this energy can do once transformed to kinetic energy.

### Answers to the questions:

- Q1. It rolls.  
Q2. Potential energy  
Q3. Kinetic energy  
Q4. Potential to kinetic energy

### Work, Energy and Power

People possess energy. They get their energy from the food they eat. As shown and demonstrated in the previous lesson, this energy can be transferred to objects.

When people do things such as walking or running, they expend energy. The rate at which they expend energy is called power. Power is the rate of doing work or the rate of using energy.

## Enjoying the Beat of Term: An Mental Symphony within **Georia 8th Grade Science Notebook Teachers Edition**

In a world consumed by monitors and the ceaseless chatter of instantaneous interaction, the melodic beauty and psychological symphony created by the written term often diminish in to the back ground, eclipsed by the relentless noise and disturbances that permeate our lives. But, located within the pages of **Georia 8th Grade Science Notebook Teachers Edition** a wonderful literary treasure overflowing with natural feelings, lies an immersive symphony waiting to be embraced. Crafted by an elegant composer of language, this charming masterpiece conducts readers on a mental trip, well unraveling the hidden tunes and profound impact resonating within each carefully constructed phrase. Within the depths of this touching assessment, we will investigate the book is central harmonies, analyze its enthralling publishing type, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
