Alleman,Jon M. Quigley,2024-03-15

Project success is an elusive goal in every business or technical domain Project failure usually results from unhandled risks to

the technical cost and schedule aspects of the project There are four primary root causes of project failure Unrealistic performance expectation with missing Measures of Effectiveness Unrealistic cost and schedule estimates based on inadequate risk adjusted growth models Inadequate assessment of risk and unmitigated exposure to these risks without proper handling strategies Unanticipated technical issues with alternative plans and solutions to maintain the effectiveness of the project processes and its deliverables Risk Management provides a comprehensive overview of the people principles processes and practices as the fundamental base upon which an effective risk management system resides However this does not guarantee effective risk management and successful projects and businesses The first half of the book describes risk management processes as well as a delineation between risk and hazards and how these are connected The second half of the book provides industry examples of the approach to risk management in specific context and with specific approaches and artifacts where applicable The book focuses on risks created by uncertainty their identification and the corrective and preventive actions needed to address these risks to increase the probability of project success The book s goal is to provide a context driven framework developing a foundation for a rational approach to risk management that makes adaptation to circumstances as easy as possible

The Art and Craft of Policy Advising David Bromell, 2022-06-20 This book offers a practical guide for policy advisors and their managers grounded in the author s extensive experience as a senior policy practitioner in New Zealand s Westminster style system of government A key message is that effective policy advising is less about cycles stages and steps and more about relationships integrity and communication Policy making is incremental social problem solving Policy advising is mostly learned on the job like an apprenticeship It starts with careful listening knowing one s place in the constitutional scheme of things winning the confidence of decision makers skillfully communicating what they need to hear and not only what they want to hear and learning to lead from behind scheme virtuously and play nicely with others The author introduces a public value approach to policy advising that uses collective thinking to address complex policy problems evidence informed policy analysis that also factors in emotions and values and the practice of gifting and gaining rather than trade offs in the long term public interest Theory is illustrated by personal anecdote and each chapter offers practical processes tools techniques and questions for reflection to help readers master the art and craft of policy advising This second edition has been substantially revised and updated It provides an expanded step by step approach to stakeholder analysis and prioritisation in relation to an agency s own strategic frame it aligns and integrates theory about the public interest public value and anticipatory governance and it updates a fair go multi criteria decision analysis matrix with the latest iteration of the N Z Treasury s Living Standards Framework

Transnational Policy Innovation Fabrizio De Francesco, 2024-10-31 This book analyses the role of the OECD in diffusing policy innovations Through the study of regulatory impact analysis RIA it shows how transnational networks affect national policy process De Francesco s analytical framework encompasses the institutional features as well as internal and international determinants of a policy innovation

such as RIA Drawing on original data sets three empirical analyses assess to what extent government decisions to adopt implement and evaluate RIA were driven by the OECD Transnational Policy Innovation argues that concepts of policy innovation diffusion provide a useful framework for understanding the dynamics of transnational governance It shows that the OECD has been successful in framing and diffusing a template of evidence based decision making However downplaying RIA as an instrument of political control has limited the influence of the OECD s peer review and comparative indicators on the administrative and institutional setting
