[Data-Driven Law](#) Edward J. Walters, 2018-07-16 For increasingly data savvy clients lawyers can no longer give it depends answers rooted in anecdote Clients insist that their lawyers justify their reasoning and with more than a limited set of war stories The considered judgment of an experienced lawyer is unquestionably valuable However on balance clients would rather have the considered judgment of an experienced lawyer informed by the most relevant information required to answer their questions *Data Driven Law* Data Analytics and the New Legal Services helps legal professionals meet the challenges posed by a data driven approach to delivering legal services Its chapters are written by leading experts who cover such topics as Mining legal data Computational law

Uncovering bias through the use of Big Data Quantifying the quality of legal services Data mining and decision making Contract analytics and contract standards In addition to providing clients with data based insight legal firms can track a matter with data from beginning to end from the marketing spend through to the type of matter hours spent billed and collected including metrics on profitability and success Firms can organize and collect documents after a matter and even automate them for reuse Data on marketing related to a matter can be an amazing source of insight about which practice areas are most profitable Data driven decision making requires firms to think differently about their workflow Most firms warehouse their files never to be seen again after the matter closes Running a data driven firm requires lawyers and their teams to treat information about the work as part of the service and to collect standardize and analyze matter data from cradle to grave More than anything using data in a law practice requires a different mindset about the value of this information This book helps legal professionals to develop this data driven mindset **New Suits** Michele
