Embedded With Remfs English Edition:

Embed Nick Allen, 2014-10-06 In 2007 journalist Nick Allen quit a secure job in Pakistan as a news agency writer to experience the life of foreign troops fighting the Taliban in Afghanistan. Over several years he journeyed as an embedded reporter with a dozen armies working his way through placid backwaters to remote savage hotspots where daily clashes with insurgent forces were the norm. Driven by a desire to himself live and then convey some of the drama, tragedy, farce and sheer frustration experienced by soldiers and marines from California to Copenhagen, Allen returned again and again for embeds with different contingents to explore a multinational effort that will surely define NATO's future and events in South Asia and the world for many years to come. No other writer managed to gain such broad access to the forty-two country Coalition that was deployed in Afghanistan or produce an account that carries so much of the essence of soldiering in this inhospitable environment where extremes of climate, treachery and enemy cunning have always defeated nations that dared to wage war in the graveyard of empires. Embed explores the fragile calm of Bamiyan and its ancient sites and other low intensity regions usually ignored but a vital part of the overall picture together with the ferocious clashes of Helmand, Kandahar, Kunar and other provinces. The author found that even the most sophisticated armed forces had been sucked into a fight they were ill prepared for and amid political uncertainty and dwindling public support back home ultimately could not win. McCormick, Yuliya Voytenko Palgan, 2018-05-03 All cities face a pressing challenge: how can they provide economic prosperity and social cohesion while achieving environmental sustainability? In response, new collaborations are emerging in the form of urban living labs: sites devised to design, test and learn from social and technical innovation in real time. The aim of this volume is to examine, inform and advance the governance of sustainability transitions through urban living labs. Notably, urban living labs are proliferating rapidly across the globe as a means through which public and private actors are testing innovations in buildings, transport and energy systems. Yet despite the experimentation taking place on the ground, we lack systematic learning and international comparison across urban and national contexts about their impacts and effectiveness. We have limited knowledge on how good practice can be scaled up to achieve the transformative change required. This book brings together leading international researchers within a systematic comparative framework for evaluating the design practices and processes of urban living labs to enable the comparative analysis of their potential and limits. It provides new insights into the governance of urban sustainability and how to improve the design and implementation of urban living labs in order to realise their potential. **The Oxford Handbook of Criminal Process** Darryl K.
