Great Expectations Commission on the Social Sciences, 2017-10-19 The social sciences in the United Kingdom are extensive diverse and influential At any one time more than four million students study the social sciences in schools and about a half million students study social science in universities Total university income from the social sciences is at the four billion dollar level Beyond that many social scientists hold key positions in government business the media civil service and the voluntary sector *Great Expectations* reviews the status of the social sciences in Great Britain at the beginning of the twenty first century While making clear that work opportunities for social scientists are substantial and that levels of intellectual performance equal that of graduates in physics it provides a hard hitting empirically grounded examination of a near crisis situation The report goes far beyond what one conventionally expects in commissioned reports arguing that the academic treadmill driven by excessive accountability burdens reduces the originality and quality of much academic research The report emphasizes the ideological and parochial nature of much British social research As a result there is little applicability internationally even less interdisciplinary work and at times an outright bias against the market economy as such The Commission Report is even handed tough minded and frank in discussing how it is that social science and new social and technical forces do not always mesh The optimism exuded is measured but genuine *Great Expectations* offers policy recommendations and scientific goals that can be serviceable not only in the United Kingdom but in all advanced societies in which social research is a central component of economic stability and development It is a superb reference volume enriched by original analysis and pungent clear headed writing Members of the commission include Professor David
