Ross, 2017-03-02 There is a driving need for naval professionals to focus on human factors issues The number of maritime accidents is increasing and the chief cause is human error both by the designer and the operator Decreasing crew size lack of experienced operators operations in higher sea states and fatigue

worsen the situation Automation can be a partial solution but flawed automated systems actually contribute to accidents at sea Up to now there has been no overarching resource available to naval marine vehicle designers and human factors professionals which bridges the gap between the human and the machine in this context Designers understand the marine vehicle human factors professionals understand how a particular environment affects people Yet neither has a practical understanding of the other's field and thus communicating requirements and solutions is difficult This book integrates knowledge from numerous sources as well as the advice of a panel of eight recognized experts in the fields of related research development and operation The result is a reference that bridges the communications gap and stands to help enhance the design and operation of all naval marine vehicles *Handbook of U.S. Latino Psychology* Francisco Villarruel, 2009-07-29 Emphasizing the importance of cultural sensitivity and competence in research and intervention approaches this handbook offers unrivalled coverage of the psychology of all Latino groups in the United States

Image-guided Radiation Therapy Arno J. Mundt, John C. Roeske, 2010-12-31 Image Guided Radiation Therapy IGRT is a true revolution in the field of radiation oncology IGRT provides the unprecedented means of conforming dose to the shape of the target tissues in 3 dimensions reducing the risk of complications thereby improving the quality of life of irradiated patients Moreover IGRT provides the means to deliver higher than conventional doses thus improving the chance of cure in these patients Despite its established benefits several barriers exist to the widespread clinical implementation of IGRT In the past great concerns existed regarding the large capital outlay needed for both software and hardware This barrier is less relevant today given the increased reimbursements possible with IGRT Today the most significant barrier is education IGRT is a fundamentally new approach to both treatment planning and delivery Adoption of the IGRT approach entails new ways of thinking in regard to patient selection treatment planning and quality assurance measures Unfortunately apart from a few University based short courses limited resources are available for the physician and physicist interested in learning IGRT
