Generation Jobless? P. Vogel, 2015-03-05 Offering guidance on the opportunities and threats for future generations and featuring interviews with business leaders this book provides a constructive look at change. It directs the youth to become job creators not job seekers and to approach the corporate and political worlds with an entrepreneurial mind set. Chinese Students in UK Further Education Rosemary A. Reynolds, 2017-12-15 Chinese students in the UK have been increasing in number for many years yet competition from other Western educators and increasing investment in China's own education system has led to concern that UK institutions may soon see a decline in their market share. Dr Reynolds addresses this issue in Chinese Students in UK Further Education by attempting to understand students' experiences from their perspective. Beginning with an exploration of why these students choose to come and study in the UK and why they are coming at younger ages, the book goes on to discuss topics such as risk, technology and diversity in order to understand which factors have the greatest influence on where they choose to study and whether they choose to remain at an institution. Drawing on data from two different education institutions providers of GCSE A level programmes for students aged 16-18 years, Dr Reynolds attempts to understand what these students experience during their studies, how they manage new social relationships and whether, upon course completion, they achieved the results they desired at the outset. Moreover, the book aims to ascertain whether the students feel in hindsight that the decision to risk investing in UK further education was right and what they might communicate about UK study to contacts in China and elsewhere. The book examines what further education institutions do well and where they might improve to help develop Chinese students' educational experiences. As such, it will be essential reading for academics, researchers and postgraduates in the fields of further education, sociology of education, international and intercultural education and mobility studies. **English Language in India** Jaskiran Bedi, 2019-08-13 This book examines the relationship between the English language and growth, economic and inclusive in India. It explores why English continues to be the language of aspiration long after Independence. With the second largest English speaking population in the world today, India is testimonial to how a linguistic legacy continues to cast a long shadow on its contemporary discourse in the economic arena. The volume explores how English language proficiency constitutes as human capital. Draws in the latest India Human Development Survey data. Investigates the relationship between the language and economic indicators such as wages, household income and state growth. Further investigates the role of English language in the inclusivity of growth. Provides a snapshot of the pedagogy of English in the Indian education system. First of its kind in scope, this volume will be of great interest to scholars of economics, education, sociolinguistics, development studies, politics and sociology. It will also be of great interest to the general reader. Public City Beau B. Beza, Brendan Gleeson, 2014-11-25 Paul Mees' urban ideal counted on watchful, confident and well-informed citizenry to work collectively in a quest for fair and just cities. As such, The Public City is largely a critique of neo-liberalism and its arguably negative influence on urban

prospects As Mees explained it neo liberal urbanism was much more than a political aberration it was a threat that imposed many costly failures in an age overshadowed by grave ecological challenges Fifteen of Australia and New Zealand s leading urban scholars including Professor Emeritus Jean Hillier and Professor Brendan Gleeson have contributed to this collection The Public City includes a foreword by the late Professor Sir Peter Hall a world leader in urban planning from Britain Kenneth Davidson one of Australia s top economic columnists has also contributed a chapter The collective works in this book extend beyond an analysis of urban patterns to provide a blueprint for the improvement of civic and institutional purpose in the creation of the public city

Land Law and the Extractive Industries Victoria R Nalule,2021-08-26 This book analyses the nexus between land access and the extractive industries in Africa specifically highlighting the gaps in energy land and mining laws and the practical solutions needed to settle the increasing number of land disputes in resource rich areas Access to land is essential for the successful operation of energy and mining projects However there are often social environmental and economic issues associated with acquiring land for these projects Socially many people are relocated economically local communities are not given adequate compensation environmentally pollution negatively impacts on the agricultural and fishing industries relied on by over 80% of the local communities Against this stark background and drawing from the author s fieldwork research this book addresses the important question of whether the different land tenure systems coupled with administration and registration procedures are adequate to address the increasing land disputes in oil and mineral rich African countries

Rise of the Robots Martin Ford,2015-05-05 The New York Times bestselling guide to how automation is changing the economy undermining work and reshaping our lives Winner of Best Business Book of the Year awards from the Financial Times and from Forbes Lucid comprehensive and unafraid an indispensable contribution to a long running argument Los Angeles Times What are the jobs of the future How many will there be And who will have them As technology continues to accelerate and machines begin taking care of themselves fewer people will be necessary Artificial intelligence is already well on its way to making good jobs obsolete many paralegals journalists office workers and even computer programmers are poised to be replaced by robots and smart software As progress continues blue and white collar jobs alike will evaporate squeezing working and middle class families ever further At the same time households are under assault from exploding costs especially from the two major industries education and health care that so far have not been transformed by information technology The result could well be massive unemployment and inequality as well as the implosion of the consumer economy itself The past solutions to technological disruption especially more training and education aren t going to work We must decide now whether the future will see broad based prosperity or catastrophic levels of inequality and economic insecurity Rise of the Robots is essential reading to understand what accelerating technology means for our economic prospects not to mention those of our children as well as for society as a whole

How We Teach Science John L. Rudolph,2019-06-01 Despite an enduring belief that science should be taught there has been no enduring

consensus about how or why This is especially true when it comes to teaching scientific process John Rudolph shows that how we think about and teach science will either sustain or thwart future innovation and determine how science is perceived by the public

Revolutionizing World Trade Kati Suominen, 2019-11-19 Almost 15 years ago in *The World is Flat* Thomas Friedman popularized the latest wave of globalization as a world of giant corporate supply chains that tripled world trade between 1990 and 2010 Major corporations such as Apple Dell and GE offshored manufacturing to low cost economies China became the world's factory mass producing and exporting computers and gadgets to Western shoppers This paradigm of globalization has dominated global trade policy making and guided hundreds of billions of dollars in business investments and development spending for almost three decades But we are now on the cusp of a new era *Revolutionizing World Trade* argues that technologies such as ecommerce 3D printing 5G the Cloud blockchain and artificial intelligence are revolutionizing the economics of trade and global production empowering businesses of all sizes to make move and market products and services worldwide and with greater ease than ever before The twin forces of digitization and trade are changing the patterns players politics and possibilities of world trade and can reinvigorate global productivity growth However new policy challenges and old regulatory frameworks are stifling the promise of this most dynamic prosperous and inclusive wave of globalization yet This book uses new empirical evidence and policy experiences to examine the clash between emerging possibilities in world trade and outdated policies and institutions offering several policy recommendations for navigating these obstacles to catalyze growth and development around the world
