The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace's reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America's oldest public schools

The Latino Question

Armando Ibarra, Alfredo Carlos, Rodolfo D Torres, 2018-08-20 While so many Latino Chicano Americans struggle in pursuit of the American dream while figures such as Donald Trump are accepted in mainstream politics and scaremongering and paranoia is rife the need for a vivid empirically grounded study on Latino politics culture and society has never been greater

The Latino Question fulfils this need offering a cutting edge analysis of the transformative nature of Latino politics in the US In a radical alternative to dominant ideas the authors emphasise the importance of political economy for understanding Latino politics culture and social issues It draws from original research and a number of critical traditions including the thought of Karl Marx and Antonio Gramsci to understand the politics of race and ethnicity in a modern capitalist society Including case studies of how Latino Chicano communities across the US are not only resisting but also reinventing and transforming ethnic politics in the age of neoliberalism this book is required reading for all those hoping to understand the Latino question in contemporary America

A Living History of Immunology Kendall Arthur Smith,2015-11-04 In the highly competitive world of biomedical science often the rush to publish and to be recognized as first with a new discovery concept or method is lost in the hurly burly of the moment as the maddening crowd moves on to the next new thing One of the great things about immunology today is that it has only become mature as a science within the last half century and especially within the past 35 years as a consequence of the revolution of molecular immunology which has taken place only since 1980 Consequently most of those who have contributed to our new understanding of how the immune system functions are still alive and well and still contributing Thus A Living History of Immunology collates many stories from the investigators who actually performed the experiments that have established the frontiers of immunology Accordingly this volume combats revisionist science by those who want to alter history by telling the stories a different way than actually happened In this regard one of the good things about science vs other disciplines is that we have the written record of what was done when it was done and by whom Even so we do not have the complete story or narrative of how and why experiments were done and what made the differences that led to success This volume captures and chronicles some of these stories from the past fifty years in immunology

After the Education Wars Andrea Gabor,2018-06-12 The education wars have been demoralizing for teachers After the Education Wars helps us to see a better way forward Cathy N Davidson The New York Times Book Review After the Education Wars is an important book that points the way to genuine reform Diane Ravitch author of Reign of Error and The Death and Life of the Great American School System A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the market based measures and carrot and stick incentives informing today s reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions

born of this philosophy are all around us from Brockton Massachusetts where the state's once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what's needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools

A Question of Worth Chris Steed, 2016-09-14 We live in a world that has become a resource a world conditioned by the progressive domination of a monetary scale applied across the board Our value and worth are contingent upon what we earn on what we own Amidst the increasing financialisation that characterises much of the globe the prevailing ethos is that the only values we can usefully measure are those that can be quantified and expressed in terms of economics Yet economic value and the value of the human are closely connected erode the economic and you erode the personal In the global economic crash of recent years it has been people who have been under assault not just financial value The vulnerability of a society shaped solely by economic and monetised transactions is exposed when the economy and the monetisation of everything fails When the economic machine seizes up it is people who are devalued and dumped Drawing upon his experience in government education and the Church the author asks Must we be a market society as well as a market economy Can we devise a non economic account of describing human value and worth Christopher Steed argues that the really important issues that frame the contemporary human situation are those that cannot be measured Quality is also vital to human flourishing what after all is wealth for In this timely and important work the author calls for a wider concept of value one that encompasses both economic value and human value and for a society that cultivates the importance of the human

Class Size Peter Blatchford, Kam Wing Chan, Maurice Galton, Kwok Chan Lai, John Chi-Kin Lee, 2016-04-28 Much debate research and commentary about class sizes in schools is limited because of an exclusive concern with class size and pupil academic attainment and a neglect of classroom processes which might help explain class size effects or lack of them Very little is known about the central question how can teachers make the most of class size changes Much of the commentary on class size effects has focused on Western and English speaking countries but there are promising developments elsewhere particularly the Small Class Teaching initiatives in East Asia in the past decade which have brought new knowledge and practical wisdom to the class size debate This book seeks to move toward a clearer view of what we know and do not know about class size effects and to identify future steps in terms of policy and research There is a huge and exciting potential for international collaboration on knowledge concerning class size effects which can help with research informed policy The book aims to draw out Eastern and Western international contexts which underpin any understanding of the role of class size in school learning The book has chapters by an international team of experts on class size effects including Maurice Galton and John Hattie Chapters are organised into four main sections Socio cultural and political contexts to the class size debate in the East and West Research evidence on class size Class size and classroom

processes likely to be related to class size changes Professional development for small class teaching in East Asia

Technology and Corporate Law Godwin, Andrew, Lee, Pey W., Langford, Rosemary Teele, 2021-08-27 In light of the overwhelming impact of technology on modern life this thought provoking book critically analyses the interaction of innovation technology and corporate law It highlights the impact of artificial intelligence and distributed ledgers on corporate governance and form examining the extent to which technology may enhance or displace conventional theories and practices concerning corporate governance and regulation Expert contributors from multiple jurisdictions identify themes and challenges that transcend national boundaries and confront the international community as a whole *Unhappy the Land* Liam Kennedy, 2015-10-26 In *Unhappy the Land* Liam Kennedy poses fundamental questions about the social and political history of Ireland and challenges cherished notions of a uniquely painful past Images of tragedy and victimhood are deeply embedded in the national consciousness yet when the Irish experience is viewed in the larger European context a different perspective emerges The author's dissection of some pivotal episodes in Irish history serves to explode commonplace assumptions about oppression victimhood and a fate said to be comparable only to that of the Jews Was the catastrophe of the Great Famine really an Irish Holocaust Was the Ulster Covenant anything other than a battle cry for ethnic conflict Was the Proclamation of the Irish Republic a means of texting terror And who fears to speak of an Irish War of Independence shorn of its heroic pretensions Kennedy argues that the privileging of the gun the drum and the flag above social concerns and individual liberties gave rise to disastrous consequences for generations of Irish people Ireland might well be a land of heroes from C chulainn to Michael Collins but it is also worth pondering Bertolt Brecht's warning *Unhappy the land that is in need of heroes* *Understanding West Africa's Ebola Epidemic* Ibrahim Abdullah, Ismail Rashid, 2017-10-15 From 2013 to 2015 over 11 000 people across West Africa lost their lives to the deadliest outbreak of the Ebola virus in history Crucially this epidemic marked the first time the virus was able to spread beyond rural areas to major cities overturning conventional assumptions about its epidemiology With backgrounds ranging from development to disease control the contributors to this volume some of them based in countries affected by the Ebola epidemic consider the underlying factors that shaped this unprecedented outbreak While championing the heroic efforts of local communities and aid workers in halting the spread of the disease the contributors also reveal deep structural problems in both the countries and humanitarian agencies involved which hampered the efforts to contain the epidemic Alarming they show that little has been learned from these events with health provision remaining underfunded and poorly equipped to deal with future outbreaks Such issues they argue reflect the wider challenges we face in tackling epidemic disease in an increasingly interconnected world
