Who Really Rules? G. William Domhoff, 1978 Robert A Dahl s Who Governs is a classic pluralist study which has had an important influence on American social science since the early sixties Who Really Rules provides a categorical challenge empirical methodological and theoretical to Dahl s work Empirically Domhoff s restudy of New Haven shows through newly discovered documents that Dahl was wrong about the pluralism of New Haven s power structure He also presents the most systematic statement of power structure methodology yet made a statement that contradicts Dahl s methodological claims which have been the prevailing wisdom in American social science for over fifteen years Finally Domhoff outlines the national

policy planning network through which the big business ruling class dominates urban government Who Really Rules is unique in that it makes possible for the first time a dialogue between pluralist and ruling class views on the basis of studies of the same city by leading exponents of the rival theoretical positions It is original in that it includes much data not revealed by Dahl It presents the methodology of power structure research in the most comprehensive fashion yet attempted and reveals a ruling class network for urban policy planning that has never before been fully articulated The School Journal ,1905
