Tractors and their Power Units D. Smith, 2012-12-06 At the time of the writing of the fourth edition of this textbook the agricultural economy in the United States and Canada was depressed The prices paid to farmers for their grain crops were very low and consequently most farmers in North America could not afford to buy a new tractor when needed therefore the sales of tractors and other farm machines were much below normal The farmer who was the victim of the depressed economy was forced to make do Instead of purchasing a new tractor when the old one needed to be replaced the farmer usually purchased a used or second hand tractor or repaired the old one In a strict sense tractors usually do not wear out instead they become obsolete The farmer who owns an obsolete tractor would prefer to replace it with one having more power more speeds more conveniences a better hydraulic system lower operating cost or all of the above But farmers in the United States Canada and

other industrial nations will continue to want to purchase tractors that have all of the features including microprocessors found on other vehicles
