Sample Lesson Plans in Science

Issues

- All government or the industry level

Objectives of the Module

Module 4 provides C2 and teachers with sample lesson plans for challenging topics in Science. These sample lesson plans may not be used as-is without the NEP 2020 documentation being read.

All the sample lesson plans are in accordance with the Ministry of Education (MHR) Teaching Guidelines for Integrated Science (Primary 5 to 6).

The section also provides teacher implications of what challenging topics are at the beginning of the module.

The module has sample lesson plans on some selected topics. Sample lesson plans have been prepared on topics such as, "Disposition of Soil" and "Characteristics of Water and Other Liquids". Looking at Natural Structures, Lesson Plans, Teaching Notes, (Copyright © National) and English as a Teaching Tool for the other hand, the other topics, "Weathering", "Production of Sound" and "Disposition of Soil" are presented. Lesson 4c has and English as a Teaching Tool note. Below is a brief explanation of each topic.

Lesson Disposition consists of introduction, objectives of the topic and the lesson and R.P.R. "Introduction" illustrates the importance and relevance of the lesson to real life. All the "Introduction" are taken from the textbook "R.P.R." and selected content is highlighted that people are expected to know.

Lesson Plans (sometimes also called lesson plans) is a written lesson approach to the teaching of a particular topic. This written lesson approach is organized and directs the teacher in further teaching activities. It sets planned lesson topics that teacher to teach with confidence. The lesson of the lesson plan is the same as the completed lesson plan that C2C app uses.

The sample lesson plans on "Disposition of Soil" and "Characteristics of Water and Other Liquids" also contain "Lesson plans with teaching notes" on the next page of the completed lesson plan. The lesson plan with teaching notes is the same as the completed lesson plan on the previous page except for the sample notes (completed teaching notes) placed on the lesson plan. The sample notes suggest where each of the teaching activities to be used.

Teaching Notes provide suggested teaching approaches. It is designed that each of the teaching topics explained here to achieve a particular teaching activity (e.g. introduction, activity 1.2, ...) in the development of a lesson. Because some of these teaching activities are linked with the core process of the lesson, successful delivery of the teaching activities should lead to a more understanding of the core process.

The teaching notes also include with general teaching approaches and questioning skills for particular teaching activities. The general teaching approaches describe how the teacher can lead people to the next process through the activities. When the activity is an experiment, the teaching approach explains how to conduct the experiment, giving special attention to the process skills of Science. The questioning skills should also help the teacher to lead people to learn a good understanding of the core process. It is recommended that teachers develop better teaching approaches and questions for the lesson and other lessons that they get the idea that the teaching approaches suggested.
