Lesson Plans in Fourth Grade History M. Annie Grace, Emma C. Monroe, 1917 Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2022-04-01 Science is unique among the disciplines since it is inherently hands on. However, the hands-on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning Killham et al 2014 Wong et al 2018 PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments Molnar et al 2021 Seaman et al 2018. This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy. Brigid Borrachero Bermejo Gunning Duran Duran 2004 Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation. Journeys in Science James A. Shymansky, 1988 *New Teachers in Urban Schools: Journeys Toward Social Equity Teaching* Althier M. Lazar, Leslie M. Reich, 2016-03-07 This volume informs the reader about new teachers in urban underserved schools and their development as teachers for social equity. The accounts of five novice teachers who grew up outside the communities in which they teach lead to chapters that contain advice for teacher educators, future and current teachers, and school leaders. These early career teachers learned much about bridging the cultural divide between themselves and their students, confronted and resolved big challenges that may immobilize some who set out to teach in these communities. They brought to their classrooms strong social justice orientations including a moral imperative to make a difference in the world, an awareness of social and educational inequalities, and a strong sense of responsibility to positively influence the life trajectories of students in their charge. Their narratives offer insights on the dispositions and contexts that will help early career teachers survive and thrive and make a difference in their students' lives.
