Trigeminal Neuralgia Giulia Di Stefano, 2022-11-30 Trigeminal Neuralgia is a unique neuropathic facial pain condition characterized by unilateral paroxysmal pain most often described as stabbing or electric shock like restricted to the distribution of one or more divisions of the trigeminal nerve territory and triggered by innocuous stimuli Trigger zones are reported in virtually the totality of patients and represent the hallmark sign of Trigeminal Neuralgia The development and application of a dedicated software allowed trigger zone overlap profiling of the extraoral and intraoral territories The analysis of the natural history of Trigeminal Neuralgia showed that the failure of the treatment with first line drugs carbamazepine and oxcarbazepine most of the times is not due to the inefficacy of the drug but rather to undesired effects to a level that causes interruption of treatment or a dosage reduction to an insufficient level These results suggest the opportunity to develop a better tolerated drug Winner of the Competition Prize for PhD Thesis 2020 arranged by Sapienza University Press

The Brilliance of Black Children in Mathematics Jacqueline Leonard, Danny B. Martin, 2013-03-01 This book is a critically important contribution to the work underway to transform schooling for students who have historically been denied access to a quality education specifically African American children The first section of the book provides some historical perspective critical to understanding the current state of education in the U S specifically for the education of African American children The following sections include chapters on policy learning ethnomathematics student identity and teacher preparation as it relates to the mathematical education of Black children Through offering counternarratives about mathematically successful Black youth advocating for a curriculum that is grounded in African American culture and ways of thinking providing shining examples of the brilliance of Black students and promoting high expectations for all rather than situating students as the problem the authors of this book provide powerful insights related to the teaching and learning of mathematics for African American students As is made evident in this book effective teaching involves much more than just engaging students in

inquiry based pedagogy Kitchen 2003 The chapters offered in this book demonstrate how mathematics instruction for African American students needs to take into account historical marginalization and present day policies that do harm to Black students Kunjufu 2005 Empowering mathematics instruction for African American students needs to take into consideration and promote students cultural spiritual and historical identities Furthermore mathematics instruction for African American students should create opportunities for students to express themselves and the needs of their communities as a means to promote social justice both within their classrooms and communities

Abraham Lincoln's Cyphering Book and Ten other Extraordinary Cyphering Books Nerida F. Ellerton, M. A. (Ken) Clements, 2014-03-26 This well illustrated book provides strong qualitative and comparative support for the main arguments developed by Nerida Ellerton and Ken Clements in their groundbreaking *Rewriting this History of School Mathematics in North America 1607-1861: The Central Role of Cyphering Books*. Eleven extraordinary handwritten school mathematics manuscripts are carefully analyzed: six were prepared entirely in Great Britain, four entirely in North America, and 1 partly in Great Britain and partly in North America. The earliest of the 11 cyphering books was prepared around 1630 and the latest in 1835. Seven of the manuscripts were arithmetic cyphering books, three were navigation cyphering books, and one was a mensuration/surveying manuscript. One of the cyphering books examined in this book was prepared over the period 1819-1826 by a young Abraham Lincoln when he was attending small one-teacher schools in remote Spencer County, Indiana. Chapter 6 in this book provides the first detailed analysis of young Abraham's cyphering book, which is easily the oldest surviving Lincoln manuscript. Another cyphering book, this one prepared by William Beattie in 1835, could have been prepared as a special gift for the King of England. The analyses make clear the extent of the control which the cyphering tradition had over school mathematics in North America and Great Britain between 1630 and 1840. In their final chapter, Ellerton and Clements identify six lessons from their research into the cyphering tradition which relate to present-day circumstances surrounding school mathematics. These lessons are concerned with sharp differences between intended, implemented, and attained curricula; the remarkable value that many students placed upon their cyphering books; the ethnomathematical circumstances which surrounded the preparations of the extraordinary cyphering books; and qualitative differences between British and North American school mathematics.
