Gene Drives on the Horizon National Academies of Sciences, Engineering, and Medicine,Division on Earth and Life Studies,Board on Life Sciences,Committee on Gene Drive Research in Non-Human Organisms: Recommendations for Responsible Conduct,2016-07-28 Research on gene drive systems is rapidly advancing Many proposed applications of gene drive research aim to solve environmental and public health challenges including the reduction of poverty and the burden of vector borne diseases such as malaria and dengue which disproportionately impact low and middle income countries However due to their intrinsic qualities of rapid spread and irreversibility gene drive systems raise many questions with respect to their safety relative to public and environmental health Because gene drive systems are designed to alter the environments we share in ways that will be hard to anticipate and impossible to completely roll back questions about the ethics surrounding use of this research are complex and will require very careful exploration Gene Drives on the Horizon outlines the state of knowledge relative to the science ethics public engagement and risk assessment as they pertain to research directions of gene drive systems and governance of the research process This report offers principles for responsible practices of gene drive research and related applications for use by investigators their institutions the research funders and regulators Remapping Africa in the Global Space Edward Shizha,2014-11-26 What are the benefits and risks for Africa s participation in the globalisation nexus Remapping Africa in the Global Space is a visionary and interdisciplinary volume that restores Africa s image using a multidisciplinary lens It incorporates disciplines such as sociology education global studies economics development studies political science and philosophy to explore and theorise Africa s reality in the global space and to deconstruct the misperceptions and narratives that often infantilise Africa s internal and international

relations The contributions to this volume are a hybrid of both outsider and insider perspectives that create a balanced critical discourse that can provide standard paradigms that can adequately explain predict or prevent Africa s current misperceptions and myths about the African crisis and failure status The authors provide a holistic and perhaps anticolonial and anti hegemonic perspective that can benefit a wide spectrum of academics scholars students development agents policy makers in both governmental and non governmental organisations and engage some alternative analyses and possibilities for socio politico and economic advancement in Africa The book provides up to date scholarly research on continental trends on various subjects and concerns of paramount importance to globalisation and development in Africa The book is brilliant

Remapping Africa in the Global Space Propositions for Change explores Africa from the perspective of academics specialised in subject matters pertaining to the continent In this age of globalisation I find this book invaluable It is a good read as it dissects analyses and presents issues affecting the continent in an articulate and cogent way I highly recommend its use in academic institutions Magnus Mfofo M Carthy Assistant Professor Lyle S Hallman Faculty of Social Work Fellow of Tshepo Institute for the Study of Contemporary Africa Wilfrid Laurier University Kitchener Canada More than anything else Remapping Africa in the Global Space Propositions for Change speaks to the complex multifaceted and interfused character of the development challenges and prospects of Africa Indeed few books have examined contemporary Africa as comprehensively and insightfully as this edited volume it is widely welcomed in the African academic scholarly and research arena Joseph Mensah Professor of Geography York University Toronto
