Life Orientation 2015 Term2 Task3 Grade12:

Reading Success in the Early Primary Years Jocelyn Seamer, 2022-12-21 *Reading Success in the Early Primary Years* is a step by step guide to structured literacy instruction for teachers working in the early years of primary school. Written by a teacher for teachers, this book supports teachers to understand the evidence base of reading instruction and how to successfully implement it. Structured in three parts, the book breaks down complex concepts in a concise accessible manner, guiding teachers on eight key actions to take to get every child on the path to reading proficiency. These include instruction in phonics, phonological and phonemic awareness, integrated reading and spelling opportunities, and the use of decodable texts. Highly practical, *Reading Success in the Early Primary Years* offers over 20 explicit instructional routines that teachers can implement in their classrooms and guidance on how to get the most out of instructional time. These practical elements are further supported by a summary of relevant research and theories about how reading develops, including an outline of high impact explicit teaching that draws on cognitive load theory. Rich with sample lesson plans, tools, and examples from real classrooms, this book allows teachers to get on with the business of teaching reading. This is a must-have resource for all who are responsible for children's reading instruction in the first three years of school.

Child Development From Infancy to Adolescence Laura E. Levine, Joyce Munsch, 2018-11-29 Chronologically organized, *Child Development From Infancy to Adolescence* Second Edition presents topics within the field of child development through unique and highly engaging Active Learning opportunities. The Active Learning features integrated within the print text and digital program foster a dynamic and personal learning process for students. Within each chapter, authors Laura E. Levine and Joyce Munsch introduce students to a wide range of real-world applications of psychological research to child development. The in-text pedagogical features and the accompanying digital components help students discover the excitement of studying child development and equip them with skills they can use long after completing the course.

Face Perception across the Life-Span Bozana Meinhardt-Injac, Andrea Hildebrandt, 2017-03-17 Face perception is a highly evolved visual skill in humans. This complex ability develops across the life span, steeply rising in infancy, refining across childhood and adolescence, reaching highest levels in adulthood and declining in old age. As such, the development of face perception comprises multiple skills, including sensory (e.g., mechanisms of holistic configural and featural perception), cognitive (e.g., memory processing, speed, attentional control), and also emotional and social (e.g., reading and interpreting facial expression) domains. Whereas our understanding of specific functional domains involved in face perception is growing, there is further pressing demand for a multidisciplinary approach toward a more integrated view describing how face perception ability relates to and develops with other domains of sensory and cognitive functioning. In this research topic, we bring together a collection of papers that provide a snapshot of the current state of the art of theorizing and investigating face perception from the perspective of multiple ability domains. We would like to thank all authors for their valuable contributions that advanced our understanding of face and emotion.
