Intelligence Patrick C. Kyllonen, Richard D. Roberts, Lazar Stankov, 2008 This volume presents research from a variety of
 perspectives on the enhancement of human intelligence It is organized around five themes enhancement via instruction
 enhancement via development over the life cycle enhancement over time enhancement via new constructs and new
 directions in enhancement Three key issues are addressed First although most of the scientific research on intelligence has
 concerned what it is this volume attends to the consequential societal and economic issue concerns of whether it can be
 increased and how Second intellectual enhancement is particularly important when targeted to minorities and the poor
 groups that have typically performed relatively less well on intelligence and achievement measures This volume reflects the
 education community's ongoing interest in understanding and attempting to close achievement or test score gaps Third most
 of the attention to examining intellectual enhancement and in accounting for and closing the test score gap has focused on
 general cognitive ability In line with the current emphasis on considering intelligence from a wider perspective this volume
 includes constructs such as emotional and practical intelligence in definitions of intellectual functioning Extending
 Intelligence Enhancement and New Constructs is an essential volume for researchers students and professionals in the fields
 of educational psychology intelligence educational measurement and assessment and critical thinking Women and
