Selected Papers from the 3rd International Symposium on Life Science Valentin A. Stonik, 2020-12-10 This book contains information for specialists in various fields of science From the point of view of pharmacology data are reported regarding the effect of echinochrome A and related metabolites from sea urchins on the survival and functional properties of stem cells which can facilitate ex vivo application of this compound in medicine For scientists who isolate and establish structures of marine natural compounds an article devoted to the proof of the microbial origin of a typical metabolite earlier found exclusively from marine invertebrates 6 epi monanchorin may also be of interest A range of new marine metabolites was discovered from the both marine invertebrates and marine microorganisms particularly in marine isolates of fungi Some marine natural products could be applied to treat such diseases as Parkinson s disease

ischemic stroke viral infections and so on Magnificamide a new peptide from sea anemones inhibits porcine and human saliva amylases showing its probable antidiabetic properties Application of the genomic approach was discussed in studies on various marine bacteria producing marine enzymes with unusual specificity The lectins capable of recognizing glycoforms of different substrates demonstrate the possibility to be used to elaborate new medical diagnostics *The Political*

*Geographies of Pregnancy* Laura R. Woliver, 2010-10-01 A searing study of how modern reproductive politics shapes women's bodily agency Pregnancy indisputably takes place within a woman's body But as reproductive power finds its way into the hands of medical professionals lobbyists and policymakers the geographies of pregnancy are shifting and the boundaries need to be redrawn argues Laura R Woliver *The Political Geographies of Pregnancy* is a vigorous analysis of the ways modern reproductive politics are shaped by long standing debates on abortion and adoption surrogacy arrangements new reproductive technologies medical surveillance and the mapping of the human genome Across a politically charged backdrop of reproductive issues Woliver exposes strategies that claim to uphold the best interests of children families and women but in reality complicate women's struggles to have control over their own bodies Utilizing feminist standpoint theory and promoting a feminist ethic of care Woliver looks at abortion politics modern adoption laws that cater to male headed families regulations that allow the state to monitor pregnant women but not always provide care for them and the power structures behind the seemingly benign world of egg selling and surrogate parenting She also considers the potentially staggering political implications of mapping the human genome and the exclusion of women's perspectives in discussions about legislation and advancements in reproductive technologies *In Sputnik's Shadow* Zuoyue Wang, 2009

*In Sputnik's Shadow* traces the rise and fall of the President's Science Advisory Committee from its ascendance under Eisenhower to its demise during the Nixon years Zuoyue Wang examines key turning points during the twentieth century including the beginning of the Cold War the debates over nuclear weapons the Sputnik crisis in 1957 the struggle over the Vietnam War and the eventual end of the Cold War showing how the involvement of scientists in executive policymaking evolved over time and brings new insights to the intellectual social and cultural histories of the era Hearings, Reports, Public Laws United

States. Congress. House. Committee on Education and Labor, 1967 **Redefining Human Life** Robert H Blank, 2019-08-16

This book examines critical social policy issues emerging from recent developments in human reproductive technology Although considerable attention has been focused on the ethical dimensions of these developments the policy dimension has largely been obscured Dr Blank now provides a far ranging overview of the cumulative impact on society of a wide array of new reproductive technologies and the social patterns that accompany or precede their application The book begins with a description of the current context of reproductive decision making Dr Blank demonstrates how emerging technologies are producing complex and intense social policy concerns then reviews in detail human reproductive technologies and illustrates the significant consequences of technological innovations for political and legal concepts of rights and obligations Examples

include recent cases involving torts for wrongful life He analyzes possible alterations in the moral and legal status of the fetus in light of apparent technological and social policy trends and presents a paradigm of fetal rights that reflects these changes A final case is made for a comprehensive assessment of reproductive technologies as well as for the urgent need to refine concepts of human life that in the past have been taken for granted but that now are being challenged
