U.N. Food agency warns 140 million face hunger in Southern Africa
 About 140 million people face hunger in Southern Africa because of a drought that has been exacerbated by an El Niño weather pattern (a warming of ocean surface temperatures) according to the United Nations World Food Programme (WFP).
 South Africa faces its worst drought in decades after 2015 was the driest calendar year since records began in 1964.
 Cape Town is a city where this season could force the country to import up to 6 million tons of maize over half of its consumption needs. Maize prices in South Africa hit record highs.
 "One particular worrying symptom of Southern Africa's vulnerability to food and nutrition security is the alarming rate of chronic malnutrition."
 Abstract from WFP/IFPRI on SADC News on December 12 January 2017

- 2.1.1 What is "El Niño"?
 (1)
- 2.1.2 Describe how human activities could negatively influence climate that causes drought and how it influences food security.
