DeKeseredy, 2003-01-01 *Under Siege* is one of the first books of its kind. It vividly describes the devastating consequences of living in a public housing community damaged by the disappearance of manufacturing jobs, government cutbacks, and other alarming structural transformations that currently plague the United States and Canada. Walter DeKeseredy and his colleagues build on the rich theoretical perspectives developed by feminist scholars as well as those constructed by Jock Young, Robert Sampson, and William Julius Wilson as they present both the qualitative and quantitative results of a case study of six public housing estates located in an impoverished urban area. This groundbreaking book provides an in-depth analysis of predatory crime, victimization, intimate partner victimization, public racial and sexual harassment, and the relationship of all these harms to the residents' perceptions of their neighborhood, social disorganization, collective efficacy. *Under Siege* is uniquely valuable both for its rich theoretical basis and for its transparent presentation of the authors' research methodology. It is a thought-provoking sociological contribution that offers progressive strategies for ameliorating both poverty and crime in North American public housing complexes. **Healthy for Life** Brian K. Williams, Sharon M. Knight, 1994 *Kaplan and Sadock's Study Guide and Self-examination Review in Psychiatry* Benjamin J. Sadock, Virginia A. Harris, 2014-09-19 Unlike other textbooks on the subject, *Criminal Justice Policy and Planning* presents a comprehensive and structured account of the process of administering planned change in the criminal justice system. Welsh and Harris detail a simple yet sophisticated seven-stage model which offers students and practitioners a full account of program and policy development from beginning to end. The authors thoughtfully discuss the steps: analyzing a problem, setting goals and objectives, designing the program or policy, action planning, implementing and monitoring, evaluating outcomes, and reassessing and reviewing. Within these steps, students and policy makers focus on performing essential procedures such as conducting a systems analysis, specifying an impact model, identifying target populations, making cost projections, collecting monitoring data, and performing a meta-analysis. In reviewing these steps and procedures, readers can develop a full appreciation for the challenges inherent in the process and understand the tools required to meet those challenges. To provide for a greater understanding of the material, the text uses a wide array of real-life case studies and examples of programs and policies. Examples include policies such as

Restorative Justice The Second Chance Act Three Strikes Laws and the Brady Act and programs such as drug courts boot camps and halfway houses By examining the successes and failures of these innovations the authors demonstrate both the ability of rational planning to make successful improvements and the tendency of unplanned change to result in undesirable outcomes The result is a powerful argument for the use of logic deliberation and collaboration in criminal justice innovations
