

## Desktop

The desktop of OS X is part of a user interface called “Finder”. The Finder also allows the user to view their documents, applications, and system files found within volume folders and the user’s Home folder on the hard disk.

- **Finder Menu:** The Finder Menu allows for the organization of the desktop, and the ability to perform file management functions such as copy/paste and create a new folder.
- **Wireless Network:** The wireless network icon indicates whether the computer is currently connected to a wireless network, and at what strength the computer is receiving a wireless signal.
- **Spotlight:** Spotlight is a search engine built-in to OS X. This feature is helpful for finding misplaced files.
- **Hard Disk:** The hard disk is divided into a volumes section (the main disk and other drives) and a user specific Home folder.
