International Symposium on Hard Soils–Soft Rocks, 20–23 September 1993, Athens, Greece

The International Symposium on Hard Soils–Softs Rocks (HR–SR) took place in Athens (20–23 September 1993) with great success in both the number of participants and the quality of the papers presented. The Symposium was held under the auspices of the International Society for Soil Mechanics and Foundation Engineering (ISSMFE), the International Association of Engineering Geology (IAEG) and was also designated as a Regional Symposium of the International Society for Rock Mechanics (ISRM). The Symposium was organized jointly by the Hellenic and French Societies for Soil Mechanics and Foundation Engineering. The 512 delegates from 41 countries were spread over the disciplines of Geotechnical Engineering and Engineering Geology. The Symposium also provided the forum for a number of meetings, such as the Board Meeting of the ISSMFE, the meetings of the ISSMFE Technical Committee on Landslides (TC 11) and on Weak Rocks and Indurated Soils (TC 22) as well as the IAEG Commission meeting on Landslides. The Symposium attempted to shed light on the grey area between Soil Mechanics and Rock Mechanics, which includes geological materials too stiff to be classified as soils and too weak to be considered as rocks. The main sessions concentrated on the following topics:

- (1) Geological features, investigation and classification
- (2) Mechanical properties and behaviour
- (3) Foundations, excavations and retaining structures
- (4) Slope stability and protection
- (5) Embankment and fills
- (6) Tunnelling and underground openings

A special session was dedicated to applications in Petroleum Engineering. Each main session was followed by a discussion session with oral presentations and interventions from the participants. The Symposium programme also included the following special lectures by distinguished speakers:

- (1) 'The behaviour of weak rock – some answers and some questions', by Prof. P.R. Vaughan of Imperial College of Science, Technology and Medicine, UK
- (2) 'Tunnelling and site investigations', by Prof. P.B. Attewell of the University of Durham, UK
- (3) 'Nailing in hard soils and soft rocks', by Prof. F. Schlosser of Ecole Nationale des Ponts et Chaussees, France
- (4) 'Hard soil–soft rock–hard rock: evidence of substantially different effects on earthquake ground motion', by Prof. G. Gazetas, of the National Technical University of Athens, Greece.
