secrets to planning tomorrow's best teaching The authors lay out 180 high quality tasks aligned to the standards and big ideas of Grades 6-8 mathematics including number systems integers ratio and proportion equations and expressions geometry and statistics and probability The tasks are all downloadable so you can use or modify them for instruction and assessment Each big idea offers a starting task followed by what makes it a high quality task what you might anticipate before students work with the task four student examples of the completed task showcasing a distinct gap commentary on what precisely counts for mathematical understanding and the next instructional steps commentary on the misconception or incomplete understanding so you learn why the student veered off course three additional tasks aligned to the mathematics topic and ideas about what students might do with these additional tasks It's time to break our habit of rushing into re-teaching for correctness and instead get curious about the space between right and wrong answers Mine the Gap for Mathematical Understanding is a book you will return to again and again to get better at selecting tasks that will uncover students reasoning better at discerning the quality and clarity of students understanding and better at planning teaching based on the gaps you see

New Literacies Debbita Tan Ai Lin, Christine Liew Ching Ling, Ambigapathy Pandian, 2014-10-16 The notion of change is central to this book Across the globe there exists a pressing need for transformation in the way teachers teach in the manner by which learners learn and in our approach towards defining literacy in the 21st century Historically the term literacy has been used to primarily denote reading and writing abilities a designation which is today largely considered both quintessential and overly simplistic The field of literacy like many others within the realm of education has a tendency to evolve and shift from one paradigm to another vacillating between the demands of globalisation and the implications brought forth by the advent of new technologies Reading and writing communication in essence is happening in very different ways and via varied avenues blogs podcasts online news and tablets coupled with countless applications Such changes are increasingly borderless and rapidly accelerating and are bound to influence the nature of literacy itself as well as how it is perceived in diverse contexts in different parts of the world This calls for a reorientation with regard to how researchers educators and stakeholders view literacy in today's terms
