Great Britain. Parliament. House of Commons,2013 **Education and Extremisms** Farid Panjwani,Lynn Revell,Reza Gholami,Mike Diboll,2017-08-09 Education and Extremisms addresses one of the most pressing questions facing societies today how is education to respond to the challenge of extremism It argues that the implementation of new teaching techniques curricular reforms or top down changes to education policy alone cannot solve the problem of extremism in educational establishments across the world Instead the authors of this thought provoking volume argue that there is a need for those concerned with radicalisation to reconsider the relationship between instrumentalist ideologies shaping education and the multiple forms of extremisms that exist Beginning with a detailed discussion of the complicated and contested nature of different forms of extremism including extremism of both a religious and secular nature the authors show that common assumptions in contemporary discourses on education and extremism are problematic Chapters in the book provide a careful selection of pertinent and topical case studies policy analysis and insightful critique of extremist discourses Taken together the chapters in the book make a powerful case for re engaging with liberal education in order to foster values of individual and social enrichment intellectual freedom criticality open mindedness flexibility and reflection as antidotes to extremist ideologies Recognising recent criticisms of liberalism and liberal education the authors argue for a new understanding of liberal education that is suitable for multicultural societies in a rapidly globalising world This book is essential reading for academics researchers and postgraduate students with an interest in religion citizenship education liberalism secularism counter terrorism social policy Muslim education youth studies and extremism It is also relevant to teacher educators teachers and policymakers *The Economist* ,1899 *Regulating Blockchain* Philipp Hacker,Ioannis Lianos,Georgios Dimitropoulos,Stefan Eich,2019-08-29 Less than a decade after the Financial Crisis we are witnessing the fast emergence of a new financial order driven by three different yet interconnected dynamics first the rapid application of technology such as big data machine learning and distributed computing to banking lending and investing in particular with the emergence of

virtual currencies and digital finance second a disintermediation fuelled by the rise of peer to peer lending platforms and crowd investment which challenge the traditional banking model and may over time lead to a transformation of the way both retail and corporate customers bank and third a tendency of de bureaucratisation under which new platforms and technologies challenge established organisational patterns that regulate finance and manage the money supply These changes are to a significant degree driven by the development of blockchain technology The aim of this book is to understand the technological and business potential of the blockchain technology and to reflect on its legal challenges The book mainly focuses on the challenges blockchain technology has so far faced in its first application in the areas of virtual money and finance as well as those that it will inevitably face and is partially already facing as the SEC Investigative Report of June 2017 and an ongoing SEC securities fraud investigation show as its domain of application expands in other fields of economic activity such as smart contracts and initial coin offerings The book provides an unparalleled critical analysis of the disruptive potential of this technology for the economy and the legal system and contributes to current thinking on the role of law in harvesting and shaping innovation
