Current Research in Biology Education Konstantinos Korfiatis, Marcus Grace, 2022-03-16 This book is a collection of full papers based on the peer reviewed submissions accepted for the ERIDOB 2020 conference which was cancelled due to COVID 19 ERIDOB brings together researchers in Biology Education from around the world to share and discuss their research work and results It is the only major international conference on biology education research and all the papers therefore are written by international researchers from across Europe and beyond which present the findings from a range of contemporary biology education research projects They are all entirely new papers describing new research in the field The papers are peer reviewed by experienced international researchers selected by the ERIDOB Academic Committee The papers reflect the ERIDOB conference strands by covering topics on Socioscientific issues Nature of Science and scientific thinking Teaching and learning in biology Perceptions of biology and biology education Textbook analysis Outdoor and environmental education By providing a collection of new research findings from many countries this book is a great resource for researchers and practitioners such as school college and university biology teachers around the world It is useful for training biology teachers and therefore valuable to teacher training institutions

**The World of Science Education** ,2009-01-01 Each volume in the 7 volume series The World of Science Education reviews research in a key region of the world These regions include North America South and Latin America Asia Australia and New Zealand Europe and Israel Arab States and Sub Saharan Africa The focus of this Handbook is on science education in Arab states and the scholarship that most closely supports this program The reviews of the research situate what has been accomplished within a given field in an Arab rather than an international context The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts The approach allows readers to review what has been done and accomplished what is missing and what might be done next

Biblical Truths Dale B. Martin,2017-02-21 A leading biblical scholar's landmark work challenges the historical realism that has dominated the discipline for more than two centuries How can a modern person informed by science and history continue to recite the traditional creeds and confessions of the Christian church What does the Bible mean and how do we verify biblical truths In this groundbreaking book a leading biblical scholar urges readers to be more creative interpreters of biblical texts mapping out an alternative way of reading that is not first and foremost about understanding what those texts would have meant for

the original authors and readers Limiting our study to the ancient meaning of the text he argues has produced either bad history or bad theology or both One cannot derive robustly orthodox Christian doctrine or theology from a mere historical interpretation of the Bible Martin offers instead theological readings of the New Testament that are faithful to Christian orthodoxy as generally understood but without attempting a foundationalist understanding of the meaning of the text His provocative and ambitious book demonstrates how theology and scripture can remain vital in the twenty first century
