Database and Expert Systems Applications Fernando Galindo, Makoto Takizawa, Roland Traunmueller, 2004-08-19 DEXA 2004 the 15th International Conference on Database and Expert Systems Applications was held August 30 September 3 2004 at the University of Zaragoza Spain The quickly growing spectrum of database applications has led to the establishment of more specialized discussion platforms DaWaK Conference EC Web Conference EGOVConference Trustbus Conference and DEXA Workshop Every DEXA event has its own conference proceedings which were held in parallel with the DEXA Conference also in Zaragoza In your hands are the results of much effort The work begins with the preparation of the submitted papers which then go through the reviewing process The accepted papers are revised to final versions by their authors and are then arranged within the conference program All culminates in the conference itself For this conference 304 papers were submitted and I want to thank to all who contributed to it they are the real base of the conference The program committee and the supporting reviewers produced altogether 942 referee reports in average 3 1 reports per paper and selected 92 papers for presentation At this point we would like to say many thanks to all the institutions that actively supported this conference and made it possible These were University of Zaragoza FAW DEXA Association Austrian Computer Society

Location-Based Services Handbook Syed Ahson, Mohammad Ilyas, 2018-09-03 Location Based Services Handbook Applications Technologies and Security is a comprehensive reference containing all aspects of essential technical information on location based services LBS technology With broad coverage ranging from basic concepts to research grade material it presents a much needed overview of technologies for positioning and localizing including range and proximity based localization methods and environment based location estimation methods Featuring valuable contributions from field experts around the world this book addresses existing and future directions of LBS technology exploring how it can be used to optimize resource allocation and improve cooperation in wireless networks It is a self contained comprehensive resource that presents A detailed description of the wireless location positioning technology used in LBS Coverage of the privacy and protection procedure for cellular networks and its shortcomings An assessment of threats presented when location information is divulged to unauthorized parties Important IP Multimedia Subsystem and IMS based presence service proposals The demand for navigation services is predicted to rise by a combined annual growth rate of more than 104 percent between 2008 and 2012 and many of these applications require efficient and highly scalable system architecture and system services to support dissemination of location dependent resources and information to a large and growing number of mobile users This book offers tools to aid in determining the optimal distance measurement system for a given situation by assessing factors including complexity accuracy and environment It provides an extensive survey of existing literature and proposes a novel widely applicable and highly scalable architecture solution Organized into three major sections applications technologies and security this material fully covers various location based applications and the

impact they will have on the future

Evolving Application Domains of Data Warehousing and Mining: Trends and Solutions

Furtado, Pedro Nuno San-Banto, 2009-09-30 This book provides insight into the latest findings concerning data warehousing data mining and their applications in everyday human activities Provided by publisher *Information Assurance, Security and Privacy Services* H. The verification of these methods by comparing the simulation results with observed data is then presented and examples of numerical simulations which apply these methods to practical problems are generously provided Furthermore three advanced topics of computational earthquake engineering are covered detailing examples of applying computational science technology to earthquake engineering problems

Change Management for Semantic Web Services Xumin Liu, Salman Akram, Athman Bouguettaya, 2011-03-14 Change Management for Semantic Web Services provides a thorough analysis of change management in the lifecycle of services for databases and workflows including changes that occur at the individual service level or at the aggregate composed service level This book describes taxonomy of changes that are expected in semantic service oriented environments The process of change management consists of detecting propagating and reacting to changes Change Management for Semantic Web Services is one of the first books that discuss the development of a theoretical foundation for managing changes in atomic and long term composed services This book also proposes a formal model and a change language to provide sufficient semantics for change management it devises an automatic process to react to verify and optimize changes Case studies and examples are presented in the last section of this book

Business Information Systems: Concepts, Methodologies, Tools and Applications Management Association, Information Resources, 2010-06-30 Business Information Systems Concepts Methodologies Tools and Applications offers a complete view of current business information systems within organizations and the advancements that technology has provided to the business community This four volume reference uncovers how technological advancements have revolutionized financial transactions management infrastructure and knowledge workers

Introduction To Computational Earthquake Engineering (Third Edition) Muneo Hori, 2018-06-14 This book provides rigorous foundations of applying modern computational mechanics to earthquake engineering The scope covers the numerical analysis of earthquake wave propagation processes and the faulting processes and also presents the most advanced numerical simulations of earthquake hazards and disasters that can take place in an urban area Two new chapters included are advanced topics on high performance computing and for constructing an analysis model This is the first book in earthquake engineering that explains the application of modern numerical computation which includes high performance computing to various engineering seismology problems

Recent Advances in Broadband Integrated Network Operations and Services Management Sridhar, Varadharajan, Saha, Debashis, 2011-06-30 This book covers the principles of both wired and wireless communications of voice data images and video and the impact of their business values on the organizations in which they are used Provided by publisher

Building Scalable and High-performance Java Web Applications Using J2EE Technology Greg Barish, 2002 Scaling Java enterprise applications beyond just programming techniques this is the next level This volume covers all the technologies Java developers need to build scalable high performance Web applications The book also covers servlet based session management EJB application logic database design and integration and more

Location-Based Services Jochen

Schiller, Agnès Voisard, 2004-05-21 Location based services LBS are a new concept integrating a user's geographic location with the general notion of services such as dialing an emergency number from a cell phone or using a navigation system in a car. Incorporating both mobile communication and spatial data, these applications represent a novel challenge both conceptually and technically. The purpose of this book is to describe in an accessible fashion the various concepts underlying mobile location based services. These range from general application related ideas to technical aspects. Each chapter starts with a high level of abstraction and drills down to the technical details. Contributors examine each application from all necessary perspectives, namely requirements, services, data, and scalability. An illustrative example begins early in the book and runs throughout, serving as a reference. This book defines the LBS field and identifies its capabilities, challenges, and technologies. The contributors are recognized experts from academia and industry. Coverage includes navigation systems, middleware, interoperability standards, and mobile communications. A sample application, the find friend application, is used throughout the book to integrate the concepts discussed in each chapter.

Applied Ontology Engineering in Cloud Services, Networks and Management Systems Martin Serrano, 2012-02-24 Metadata standards in today's ICT sector are proliferating at unprecedented levels while automated information management systems collect and process exponentially increasing quantities of data. With interoperability and knowledge exchange identified as a core challenge in the sector, this book examines the role ontology engineering can play in providing solutions to the problems of information interoperability and linked data. At the same time as introducing basic concepts of ontology engineering, the book discusses methodological approaches to formal representation of data and information models, thus facilitating information interoperability between heterogeneous, complex, and distributed communication systems. In doing so, the text advocates the advantages of using ontology engineering in telecommunications systems. In addition, it offers a wealth of guidance and best practice techniques for instances in which ontology engineering is applied in cloud services, computer networks, and management systems. Engineering and computer science professionals, infrastructure architects, software developers, service designers, infrastructure operators, engineers, etc. are today confronted as never before with the challenge of convergence in software solutions and technology. This book will help them respond creatively to what is sure to be a period of rapid development.
