National Association of Broadcasters Engineering Handbook Garrison Cavell, 2017-07-28 The NAB Engineering Handbook is the definitive resource for broadcast engineers. It provides in depth information about each aspect of the broadcast chain from audio and video contribution through an entire broadcast facility all the way to the antenna. New topics include Ultra High Definition Television, Internet Radio, Interfacing and Streaming, ATSC 3.0, Digital Audio Compression Techniques, Digital Television Audio Loudness Management and Video Format and Standards Conversion. Important updates have been made to incumbent topics such as AM Shortwave FM and Television Transmitting Systems, Studio Lighting, Cameras and Principles of Acoustics. The big picture comprehensive nature of the NAB Engineering Handbook will appeal to all broadcast engineers everyone from broadcast chief engineers who need expanded knowledge of all the specialized areas they encounter in the field to technologists in specialized fields like IT and RF who are interested in learning about unfamiliar topics. Chapters are written to be accessible and easy to understand by all levels of engineers and technicians. A wide range of related topics that engineers and technical managers need to understand are covered including broadcast documentation, FCC practices, technical standards, security, safety, disaster planning, facility planning, project management and engineering management.

Drafting Technology Patent License Agreements Michael J. Lennon, 2007-01-01 In today's fast paced and ultra competitive high tech environment an effectively managed patent licensing program is a must. The Second Edition of *Drafting Technology Patent License Agreements* shows you how to achieve one. This valuable resource covers all of the legal and business transactional issues you are likely to encounter during the drafting and negotiation of patent licensing agreements. It guides you step by step through the unique aspects of the implementation of a patent licensing program for computers, electronics, telecommunications and other industries and it clarifies the issues involved in the enforcement and litigation of these patents. You will find incisive legal analysis on complex issues including How to implement an aggressive and well managed patent licensing program, How to evaluate a patent or portfolio for licensing, How to identify industry segments and select potential licensees, How to discuss terms with industry targets, How to formulate an effective licensing strategy, How to use databases effectively in patent practice, How to organize a licensing team, How to file a patent infringement lawsuit. And many more critical issues like these. Included with this key resource are 40 time saving forms on the bonus CD ROM. Forms for establishing a new technology company using patented technology, Confidentiality agreements for a third party vendor, third party evaluation or consultant, A projected royalty stream analysis, A semiconductor technology cross licensing agreement, Software technology license agreements, Model licensing and patent agreements for the telecommunications industry. And many more.
